## Mechanization of scalar field theory in 1+1 dimensions ( Part 2 )

*Friday, 9 June 2023 14:15 (15 minutes)*

We want to present an version of a general-purpose collective coordinate model that aims to fully map out the dynamics of a single scalar field in  $(1+1)$  - dimensions. This is achieved by a procedure that we call a 'mechanization': we reduce the infinite number of degrees of freedom down to a finite and controllable number by chopping the field into flat segments connected via joints.
