

# **The Hitchhiker's Advanced Guide to Quantum Collapse Models and their impact in science, philosophy, technology and biology**

Monday, 31 October 2022 - Friday, 4 November 2022

LNF

## **Book of Abstracts**

# Contents

Welcome . . . . .	1
Recent experimental tests of the quantum foundations of the Penrose-Hameroff theory . . . . .	1
Biophotons: general aspects and new experimental data . . . . .	1
CSL-tests with sympathetic ground-state-cooled larger molecular ions . . . . .	1
Spacetime geometry of spin, polarization, and wavefunction collapse . . . . .	1
Cascade model for calculating the yields of atomic transitions in kaonic atoms . . . . .	1
Nanomechanical test of quantum linearity . . . . .	1
Quantum collapse associated with electron tunneling in substantia nigra pars compacta tissue . . . . .	2
Observability of spontaneous collapse in flavor oscillations and its relation to the CP and CPT symmetries . . . . .	2
First in-vivo imaging of the positronium wave function collapse in the human brain . . . . .	2
Novel biomarkers and drug delivery systems for theranostics –extracellular vesicles . . . . .	2
3D printed lightweight and modular lithium-ion Uninterruptible Power Booster for research and medical devices . . . . .	2
The decay rate of o-Ps with the J-PET detector . . . . .	2
Preparation of tests of CP invariance in lepton sector using ortho- positronium annihilation . . . . .	3
Estimating anomalous weak values via a single photon detection . . . . .	3
Testing time paradoxes, discrete symmetries and all that in entangled neutral K-mesons . . . . .	3
The collapse of a quantum state as a joint probability construction . . . . .	3
A Question for Penrose’s OR and Orch-OR . . . . .	3
Collapse dynamics are diffusive? . . . . .	3
High sensitivity analysis on Pauli’s Exclusion Principle violation with VIP-2 . . . . .	4
mpact of dynamical collapse models on inflationary cosmology . . . . .	4

Collapse model make particle jiggle... and emit photons . . . . .	4
How to teach and think about spontaneous wave function collapse theories: not like before . . . . .	4
Realization of a complete Stern-Gerlach interferometer: Towards a test of the foundations of QM as well as the interface with gravity . . . . .	4
Underground tests of quantum collapse at Gran Sasso . . . . .	4
Witnessing quantum aspects of gravity . . . . .	4
Bohmian Mechanics & Primitive Ontology . . . . .	5
Recent advancements in radiation detectors for precision experiments . . . . .	5
Stochastic Renormalization Group a' la Ricci and Covariant Gravitational Collapse of the Wave Function . . . . .	5
Test of Collapse Models with the MAJORANA DEMONSTRATOR . . . . .	5
High Sensitivity Tests of of Quantum Gravity Induced Spin Statistics Deformation . . . .	5
Could entanglement play a role in the brain? . . . . .	5
A realization of de Broglie's Double Solution program: how self- induced collapse allows us to solve the measurement problem . . . . .	6
Experimental testing wavefunction collapse with mechanical systems . . . . .	6
Bose Einstein Condesates for Gravitational Wave Detection . . . . .	6
Massive candidates for DM halos: new developments . . . . .	6
The KAMEO experiment: investigating the E2 Nuclear Resonance effect in Kaonic Atoms	6
An Introduction to Trace Dynamics . . . . .	6
Comparative studies of commercial and synthesized plastic scintillators for medical appli- cations . . . . .	7
A tale of two gravity-related collapse models . . . . .	7

**Session 1 / 11**

## **Welcome**

**Corresponding Author:** catalina.curceanu@lnf.infn.it

**Session 1 / 12**

## **Recent experimental tests of the quantum foundations of the Penrose-Hameroff theory**

**Corresponding Author:** jacek.tuszynski@polito.it

**Session 1 / 13**

## **Biophotons: general aspects and new experimental data**

**Corresponding Author:** maurizio.benfatto@lnf.infn.it

**Session 1 / 14**

## **CSL-tests with sympathetic ground-state-cooled larger molecular ions**

**Corresponding Author:** drewsen@phys.au.dk

**Session 1 / 15**

## **Spacetime geometry of spin, polarization, and wavefunction collapse**

**Corresponding Author:** beil.charlie.r@gmail.com

**Session 2 / 16**

## **Cascade model for calculating the yields of atomic transitions in kaonic atoms**

**Corresponding Author:** simone.manti@lnf.infn.it

**Session 2 / 17**

## **Nanomechanical test of quantum linearity**

**Corresponding Author:** stefan.forstner@icfo.eu

**Session 2 / 20**

## **Quantum collapse associated with electron tunneling in substantia nigra pars compacta tissue**

**Corresponding Author:** crouk@jw.com

**Session 5 / 21**

## **Observability of spontaneous collapse in flavor oscillations and its relation to the CP and CPT symmetries**

**Corresponding Author:** kurylo.simonov@univie.ac.at

**Session 5 / 22**

## **First in-vivo imaging of the positronium wave function collapse in the human brain**

**Corresponding Author:** p.moskal@uj.edu.pl

**Session 5 / 23**

## **Novel biomarkers and drug delivery systems for theranostics – extracellular vesicles**

**Corresponding Author:** e.stepien@uj.edu.pl

**Session 5 / 24**

## **3D printed lightweight and modular lithium-ion Uninterruptible Power Booster for research and medical devices**

**Corresponding Author:** gabriel.moskal@doctoral.uj.edu.pl

**Session 5 / 25**

## **The decay rate of o-Ps with the J-PET detector**

**Corresponding Author:** kamil.dulski@doctoral.uj.edu.pl

Session 5 / 26

## **Preparation of tests of CP invariance in lepton sector using ortho-positronium annihilation**

**Corresponding Author:** bosnar@phy.hr

Session 5 / 27

## **Estimating anomalous weak values via a single photon detection**

**Corresponding Author:** f.piacentini@inrim.it

Session 6 / 28

## **Testing time paradoxes, discrete symmetries and all that in entangled neutral K-mesons**

**Corresponding Author:** antonio.didomenico@roma1.infn.it

Session 6 / 29

## **The collapse of a quantum state as a joint probability construction**

**Corresponding Author:** peter.w.morgan@yale.edu

Session 6 / 30

## **A Question for Penrose's OR and Orch-OR**

**Corresponding Author:** maanelid@yahoo.com

Session 6 / 31

## **Collapse dynamics are diffusive?**

**Corresponding Author:** sandro.donadi@ts.infn.it

**Session 2 / 32**

## **High sensitivity analysis on Pauli's Exclusion Principle violation with VIP-2**

**Corresponding Author:** [alessio.porcelli@lnf.infn.it](mailto:alessio.porcelli@lnf.infn.it)

**Session 7 / 33**

## **Impact of dynamical collapse models on inflationary cosmology**

**Corresponding Author:** [anirudh.gundhi@phd.units.it](mailto:anirudh.gundhi@phd.units.it)

**Session 7 / 34**

## **Collapse model make particle jiggle... and emit photons**

**Corresponding Author:** [angelo.bassi@ts.infn.it](mailto:angelo.bassi@ts.infn.it)

**Session 7 / 35**

## **How to teach and think about spontaneous wave function collapse theories: not like before**

**Corresponding Author:** [diosi.lajos@wigner.mta.hu](mailto:diosi.lajos@wigner.mta.hu)

**Session 7 / 36**

## **Realization of a complete Stern-Gerlach interferometer: Towards a test of the foundations of QM as well as the interface with gravity**

**Corresponding Author:** [folman@bgu.ac.il](mailto:folman@bgu.ac.il)

**Session 7 / 37**

## **Underground tests of quantum collapse at Gran Sasso**

**Corresponding Author:** [napolitano.fabrizio@lnf.infn.it](mailto:napolitano.fabrizio@lnf.infn.it)

**Session 7 / 38**

## **Witnessing quantum aspects of gravity**

**Corresponding Author:** anupam.mazumdar@rug.nl

**Session 7 / 39**

## **Bohmian Mechanics & Primitive Ontology**

**Corresponding Author:** reichert@math.lmu.de

**Session 8 / 40**

## **Recent advancements in radiation detectors for precision experiments**

**Corresponding Author:** alessandro.scordo@lnf.infn.it

**Session 8 / 41**

## **Stochastic Renormalization Group a' la Ricci and Covariant Gravitational Collapse of the Wave Function**

**Corresponding Author:** marciano@fudan.edu.cn

**Session 8 / 42**

## **Test of Collapse Models with the MAJORANA DEMONSTRATOR**

**Corresponding Author:** kim124@llnl.gov

**Session 8 / 43**

## **High Sensitivity Tests of of Quantum Gravity Induced Spin Statistics Deformation**

**Corresponding Author:** kristian.piscicchia@lnf.infn.it

**Session 8 / 44**

## **Could entanglement play a role in the brain?**

**Corresponding Author:** csimo@ucalgary.ca

Session 9 / 45

## **A realization of de Broglie's Double Solution program: how self-induced collapse allows us to solve the measurement problem**

**Corresponding Author:** thomas.durt@centrale-marseille.fr

Session 9 / 46

## **Experimental testing wavefunction collapse with mechanical systems**

**Corresponding Author:** h.ulbricht@soton.ac.uk

Session 9 / 47

## **Bose Einstein Condensates for Gravitational Wave Detection**

**Corresponding Author:** mihai.iliescu@lnf.infn.it

Session 9 / 48

## **Massive candidates for DM halos: new developments**

**Corresponding Author:** marco.merafina@roma1.infn.it

Session 9 / 49

## **The KAMEO experiment: investigating the E2 Nuclear Resonance effect in Kaonic Atoms**

**Corresponding Author:** luca.depaolis@lnf.infn.it

Session 9 / 50

## **An Introduction to Trace Dynamics**

**Corresponding Author:** kakade.kartik@students.iiserpune.ac.in

**Session 9 / 51**

## **Comparative studies of commercial and synthesized plastic scintillators for medical applications**

**Corresponding Author:** lukasz.kaplon@uj.edu.pl

**Session 6 / 52**

## **A tale of two gravity-related collapse models**

**Corresponding Author:** shameroff@anesth.arizona.edu
