Alessandro D'Adda memorial day

Friday, 11 November 2022 - Friday, 11 November 2022

Dipartimento di Fisica, Università di Torino

Scientific Programme

Alessandro was a brilliant and deep theoretical physicist, but also a talented photographer, and for many years an important presence in the Torino INFN Section, where he was also Coordinator of the Theory Group, and in the Physics Department, where he gave sharp and elegant courses.

The seminars will review the most important contributions of Alessandro to theoretical physics, placing them in the context of present research.
