Abstract

2

Abstract [1] [2] [3] [4] [5] [6]

3 **Contents**

4 **1 Introduction** **2**

5 1.1 Detector concept and design 2

6 1.2 Expected signal and backgrounds 2

7 1.3 2

8 **2 Electron recoils track simulation** **2**

9 **3 Modeling the detector response** **3**

10 3.1 Production, drift and diffusion of the ionization electrons 3

11 3.2 Avalanche multiplication 4

12 3.2.1 Saturation of the amplification 4

13 3.3 Image formation 5

14 3.4 Camera background noise 5

15 3.5 Other effects? 5

16 3.5.1 Optical sensor resolution? 5

17 3.5.2 Vignetting? 5

18 3.5.3 ...? 5

19 **4 Data analysis and reconstruction** **6**

20 4.1 Track reconstruction 6

21 4.2 Reconstruction algorithms optimization 6

22 4.2.1 ⁵⁵Fe source 6

23 4.2.2 Multi-source data 6

24 **5 Simulation optimization and results** **6**

25 5.1 Diffusion parameters 6

26 5.2 Attenuation length 6

27 5.3 Saturation parameters 6

28 5.4 Response linearity 6

29 **6 Conclusions** **6**

30 **1 Introduction**

- 31 **1.1 Detector concept and design**
- 32 **1.2 Expected signal and backgrounds**
- 33 **1.3 ...**

34 **2 Electron recoils track simulation**

35 In this section a brief description of any relevant information on how the tracks were simulated
 36 using *Geant* should be discussed... **Giulia?**
