

Task 6.3 :

Coordination of outreach towards general public in JENNIFER2 groups

All beneficiaries and their affiliated groups do regular outreach events to the general public

Large part of such events include JENNIFER2 physics or technologies.

IDEA: build up a portal, always up to date, where all such events can be advertised and when possible attended in streaming, over all Europe.

JENNIFER2 web page has been configured for that
(outlay may be improved, yes....)

- Preparation of such outreach portal is a deliverable, due by may 2023.
- No real work has been done so far....
- A framework will be developed, but then we need collaboration by all groups to regularly post their events
