

Recent charmed baryon results from BESIII

mercoledì 7 giugno 2023 17:20 (25 minuti)

BESIII has collected 4.5 fb^{-1} of e^+e^- collision data between 4.6 and 4.7 GeV. This unique data offers ideal opportunities to study Λ_c^+ decays. We will report the partial wave analysis of $\Lambda_c^+ \rightarrow \Lambda \pi^+ \pi^0$ and the observations of Cabibbo-suppressed Decays Λ_c^+ decays, including $\Lambda_c^+ \rightarrow n \pi^+$ etc. In addition, we will report the form factor measurement in $\Lambda_c^+ \rightarrow \Lambda e^+ \nu$, the observation of $\Lambda_c^+ \rightarrow p K^- e^+ \nu$, and improved measurement of $\Lambda_c^+ \rightarrow \Sigma^0 e^+ \nu$.
