

## Overview of XYZ Physics at BESIII

*Wednesday, June 7, 2023 3:30 PM (30 minutes)*

I will review studies of exotic meson states in the charmonium region (the XYZ states) performed by the BESIII experiment. Recent results include new decay modes of the  $X(3872)$ , new  $e+e-$  cross sections in the region of the  $Y(4230)$ , and updates on studies of the isospin-one  $Z_c$  and isospin-half  $Z_{cs}$  states. I'll also preview ongoing and future efforts, which will be much enhanced by an upcoming upgrade of the BEPCII accelerator.
