Experimental input to the hadronic corrections of the muon g-2

Monday, 5 June 2023 14:50 (25 minutes)

The hadronic contributions to the Standard Model prediction of the muon g-2 have been determined using data-driven approaches. This talk will give an overview of the hadronic cross section measurements relevant for the hadronic vacuum polarization contribution and the transition form factor measurements relevant for the hadronic light-by-light contribution.
