

Dear Contributor,

The proceedings for “**New Frontiers in Lepton Flavor 2023**” held on 8-10 May, 2023 will be published in the Proceedings Section of JINST, Journal of Instrumentation.

To prepare your contribution for submission, please use the JINST Proceedings templates:

1) available on Overleaf: <https://www.overleaf.com/latex/templates/jinst-journal-of-instrumentation-template/qkyhznbxvxn>

2) using the package `jinstpub.sty`: <https://jinst.sissa.it/jinst/help/helpLoader.jsp?pgType=author>

Kindly notice that the number of pages should not exceed 5 pages for contributed talks and 3 pages for posters.

When writing your contribution, in addition to the scientific quality and relevance of the subject matter, it is advisable also to check the quality of formatting, language and style (i.e. incoherent use of unit of measure; different conventions used in the same paper such as abbreviations “ s ”, “ sec ”, “ seconds ” and position: “ $^{\circ}\text{C}$ ”, “ C ”; poorly organized tables; etc.)

When your contribution is ready for submission, please follow the instructions below:

1. Connect to <http://jinst.sissa.it> and register;
2. in the “Submit” section of the page select the link “submit a proceedings contribution” (see attached screenshot 1);
3. select the **NFLF2023** conference from the list (see attached screenshot 2);
4. follow the step-by-step procedure for submission, referring to the instructions available in the section “For Authors” at the top of the JINST home page (<http://jinst.sissa.it/jinst/help/helpLoader.jsp?pgType=author>).

Kindly make sure you submit your contribution by **July 15, 2023**

For any further information and assistance, do not hesitate to contact me and the JINST Editorial Office (jinst-eo@jinst.sissa.it).

Yours sincerely,

Fabrizio Palla

The 7th International Conference on Micro Pattern Gaseous Detectors, MPGD22, takes place between December 11th and December 16th, 2022 at the Weizmann Institute of Science, Rehovot, Israel. The scientific program addresses new developments in: MPGDs, Detector physics, Performance studies, Simulations and software, Applications, Electronics, Production techniques.

New Frontiers in Lepton Flavor - NFLF2023

New Frontiers in Lepton Flavor is organised by INFN-Pisa and will take place at the Physics Department "E. Fermi" of the University of Pisa. Our goal is to strengthen the ties between experimental and theory communities and discuss the state of the art of lepton flavor physics in light of recent results. We will discuss lepton flavor and lepton flavor universality violation, flavor anomalies, the muon g-2 anomaly; and review recent experimental and theory developments to discuss how they can provide new insights and shape future investigations. In addition to talks by senior experts, there will be dedicated sessions for young researchers to present their work to a broader audience. PhD students and new postdocs are encouraged to submit their proposals for short (-15 min.) talks. The indico link is the following: <https://agenda.infn.it/event/33145/>
