

## Conferences:

Presentations at RICH2022 (Simone, Roberto, Chandra)

Presentation at IFD2022 (Luigi)

Proceedings of NDIP 2022

## Test-beam completed:

SPS T4-H8 with hadrons from 20 to 180 GeV/c: dRICH

PS T10 with hadrons from 4 to 11.5 GeV/c: dRICH, ALCOR, LAPPD

Several measurements done despite the sub-optimal beam availability

## DAC Meeting:

eRD102: dRICH

eRD109: electronics (ALCOR)

eRD110: sensors (SiPM, LAPPD)

**Aerogel:** Project (Elke) showed interest to be part of the development

A. Kiselev: can sacrifice tile size in favor of getting high quality sides, or perhaps with the same final goal - consider manufacturing aerogel honeycomb sheets with the transparent acrylic walls

**Mechanics:** contacts re-initiated with BNL and JLab

## October Production Readiness: Simulation

**Ready!**

- Geometry consistent with menagerie
- Optics as good as ATHENA was
