

Meeting CYGNO News

LIME Underground: Done

After long interactions, we agreed to go to take the gas system directly at Air Liquide

(Optimistic) plans are:

- Wednesday 2/11 Roberto went to Milano to take gas system;
- Thursday 3/11 gas system at LNGS (hopefully underground);
- Friday 4/11 gas system in operation and LIME gas flush On;
- Monday 7/11 ^{55}Fe source underground;
- 8 and 9 LIME, DAQ, PMT and Gas System commissioning;
- today: started LIME data tacking without shields;

LIME Underground: Plan

Next week we are going to:

- scan in VGEM1;
- scan in Z;
- scan in VGEM all;
- test with PMT to evaluate TRG efficiency;
- stability test with lower gas flush (2 l/h, now 20 l/h);
