

# IV International Workshop on Gravitomagnetism and Large-Scale Rotation Measurement

Contribution ID: 71

Type: **Oral**

## The ZAIGA Project

*Wednesday, 14 June 2023 12:10 (30 minutes)*

ZAIGA is an acronym for Zhaoshan long-baseline Atom Interferometer Gravitation Antenna. ZAIGA project concept was proposed in 2019. The first phase of the project was funded recently. It will be a platform to test gravity theory with large scale atomic interferometers, atomic gyros and atomic optical clocks. In this talk I will tell the progress in design and building of the project.

**Primary author:** ZHAN, Mingsheng (Wuhan Institute of Physics and Mathematics Chinese Academy of Sciences)

**Presenter:** ZHAN, Mingsheng (Wuhan Institute of Physics and Mathematics Chinese Academy of Sciences)

**Session Classification:** General Relativity

**Track Classification:** Fundamental Physics tests: Gravity, Lorentz violation, general relativity, cosmology etc.
