Brief overview of CERN experimental plans

Wednesday, 6 April 2011 12:00 (20 minutes)

Unfortunately we were not able to get speakers from LHCb, the upgrade or NA62 for this meeting, so in order to understand the context we are aiming for in terms of the TDR planning session we will briefly discuss these experiments.

We expect experts from those experiments to be present at Elba.

Session Classification: Parallel 6 - Physics: Other Experiments
