

# Testing gravity at cosmological scales

**Emilio Bellini** 

INFN-Trieste, IFPU, SISSA, OATS

14th February 2023

General Fellini Meeting - Roma

# The standard cosmological model (\(\Lambda CDM\))

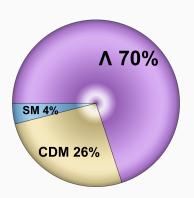

$$\underbrace{\mathsf{GR} + \Lambda + \mathsf{CDM} + \mathsf{SM}}_{\mathsf{Gravity}}$$
Ingredients

# The standard cosmological model (ACDM)

$$\underbrace{\mathsf{GR} + \Lambda + \mathsf{CDM} + \mathsf{SM}}_{}$$

Gravity

Ingredients

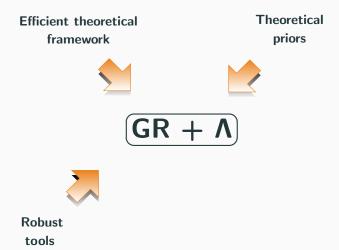

- 96% unknown!
- Λ: accelerating universe
- CDM: more matter than observed
- **SM**: standard model particles

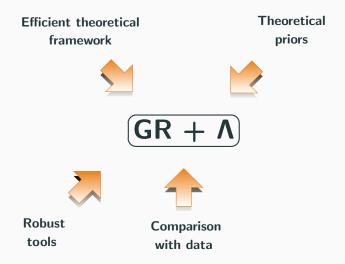

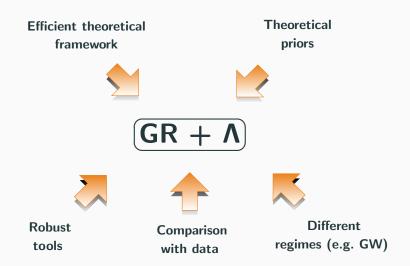

# Efficient theoretical framework

$$GR + \Lambda$$

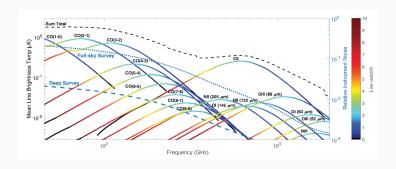

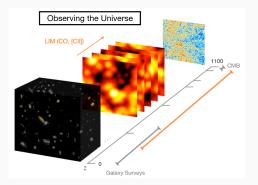

#### Line Intensity Mapping (LIM)

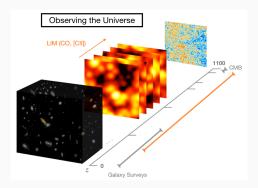

Emerging approach to survey the Universe, using relatively low-aperture instruments to scan large portions of the sky and collect the total spectral-line emission from galaxies and the intergalactic medium

- CO: Carbon Monoxide
- [CII]: Ionized Carbon

- CO: Carbon Monoxide
- [CII]: Ionized Carbon

- cheap
- low-resolution
- deeper than galaxy surveys
- complementary to galaxy surveys and CMB
- more linear than galaxy surveys (easier for MG)

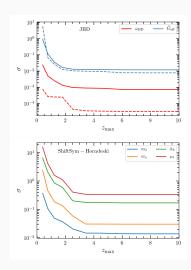

- CO: Carbon Monoxide
- [CII]: Ionized Carbon

#### Scanned many models:

- Early dark energy
- Late dark energy
- Classical models
- Complete models
- Ad-hoc models

#### Scanned many models:

- Early dark energy
- Late dark energy
- Classical models
- Complete models
- Ad-hoc models

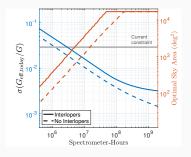

#### **Survey optimisation**

summarized in spectrometer-hours ("effort level" of an experiment)

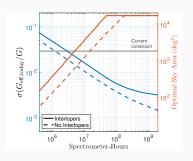

#### **Survey optimisation**

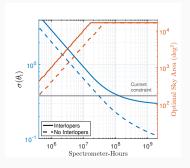

summarized in spectrometer-hours ("effort level" of an experiment)

#### **Survey optimisation**

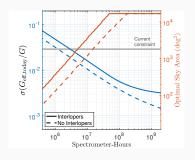

summarized in spectrometer-hours ("effort level" of an experiment)

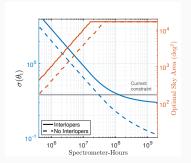

#### **Survey optimisation**

summarized in spectrometer-hours ("effort level" of an experiment)

Higher redshift dark energy model  $\rightarrow$  better constraints

#### Alessandro Pannitti CEO INCOACHING® e Coach Professionista

Nasco a Napoli nel 1967 e vio a Senigallia. Ho maturato più di 20 anni di attività ni de storre della moda, con esperienze come manager in ambito commerciale e poi care consistenze per 6 anni ho vissuto in Danimarra ricoprendo il ruolo di manager preso la società Betselleri società multimazionale dell'abbigilamiento, contribuendo all'avvio dei marchio internazionale O.N.L.Y....

#### Definition

Coaching is a method of development of a person, which takes place within a facilitating relationship, based on the identification and use of potential for the achievement of change/improvement objectives self-determined and realized through an action plan.

- you identify the problem
- you define long term goals (6-8 sessions)
- you define each session goals
- you guide each session
- and the coach???

- you identify the problem
- you define long term goals (6-8 sessions)
- you define each session goals
- you guide each session
- and the coach???
  - no understanding of physics
  - no knowledge of the academic world
  - does not give suggestions
  - does not share his personal opinions

- you identify the problem
- you define long term goals (6-8 sessions)
- you define each session goals
- you guide each session
- and the coach???
  - no understanding of physics
  - no knowledge of the academic world
  - does not give suggestions
  - does not share his personal opinions

The coach listen, ask questions: and that is enough!

#### **Conclusions**

#### Ongoing projects:

- Cosmological tensions with Early Dark Energy
- N-body solvers for Modified Gravity models
- Gravitational Waves decay into Dark Energy
- Reconstructing gravity
- Speed up for weak lensing constraints

#### Training:

- Coaching. I recommend it!
- Planned technical courses on data analysis/science

#### Secondment:

• I will let you know how it goes...

# Thank you!
