

ARENA 2008

Wednesday, 25 June 2008 - Friday, 27 June 2008

University "Sapienza", Physics Department, Building Marconi

Scientific Programme

The Conference is organized in plenary sessions. The program includes topics in: Theoretical prediction on neutrino fluxes, Acoustic and radio detection techniques, Properties of Target Materials, Signals simulation and propagation, Signal processing and Background reduction, New developments in sensors and transmitters, Results from acoustic arrays, Results from Cherenkov Radio detectors, Results from Air Shower Radio detectors, Future Projects.
