

ARENA 2008**giovedì 26 giugno 2008****Session 7 - Aula Amaldi (16:30 - 19:00)****-Coordinatori: Miquel Ardid**

time	[id] title	presenter
16:30	[9] Long Term measurements of acoustic background noise in very deep sea	Dr. RICCOBENE, Giorgio
17:00	[28] Status and First Results of the Acoustic Detection Test System AMADEUS	Dr. LAHMANN, Robert
17:30	[45] The South Pole Acoustic Test Setup: Overview	Sig. VANDENBROUCKE, Justin
18:00	[35] Acoustic noise in deep ice and environmental conditions at the South Pole	Dr. KARG, Timo
18:15	[40] Measurement of sound speed vs. depth with the South Pole Acoustic Test Setup	Sig.na DESCAMPS, Freija
18:30	[49] Simulation of a hybrid optical-radio-acoustic neutrino detector at the South Pole	TOSI, Delia
