## Constraints on axion dark matter from corrections to $g-2$ of the electron

*Tuesday, 4 July 2023 10:15 (20 minutes)*

We employ finite temperature QFT techniques to calculate corrections to  $g-2$  of the electron in the presence of axion-like particles as a local dark matter background. The precise measurements of  $g-2$  allows us to put competitive constraints on the axion-electron coupling.
