Status of the BSM and FIPs experiments in PBC

Thursday, 6 July 2023 14:10 (45 minutes)

During last years the Physics Beyond Colliders (PBC) study at CERN explored the scientific potential of the CERN accelerator complex and infrastructure to the projects complementary to LHC and other colliders. This talk presents the status of the proposals presented in the domains of Beyond Standard Model (BSM) physics, especially the search for Feebly Interacting Particles (FIPs) and dark matter candidates.

Presenter: ROZANOV, Sasha

Session Classification: Thursday Session 3
