HLRmon: nuove funzionalità

Thursday, 19 May 2011 17:50 (15 minutes)

HLRmon is the INFN accounting portal that dynamically provides information on the amount of resources installed and the corresponding aggregated usage information for all the INFN experiments (LHC and non-LHC) that are currently exploiting the Grid technology for their computing activities.

Presenter: Mr VERONESI, Paolo (CNAF)

Session Classification: IX sessione: MONITORING
