

Sezione di Pisa

## SEMINARIO

Martedì 12 aprile 2011

ore 15:00

presso INFN - Sezione di Pisa

Largo B. Pontecorvo, 3 – Edificio C  
**Aula 131 (edificio C - piano terreno)**

**Dr. Alberto Annovi**  
(*LNF - INFN*)

Terrà un seminario dal titolo

**Invariant Mass Distribution of Jet Pairs Produced in  
Association with a W boson in proton-antiproton  
Collisions at  $\sqrt{s} = 1.96$  TeV**

### **Abstract:**

The study of the invariant mass distribution of jet pairs produced in association with a W boson using data collected with the CDF detector which correspond to an integrated luminosity of 4.3 fb<sup>-1</sup> will be presented. The observed distribution has an excess in the 120-160 GeV/c<sup>2</sup> mass range which is not described by current theoretical predictions within the statistical and systematic uncertainties. In particular the properties of this excess are going to be presented.
