

Slow Control Software

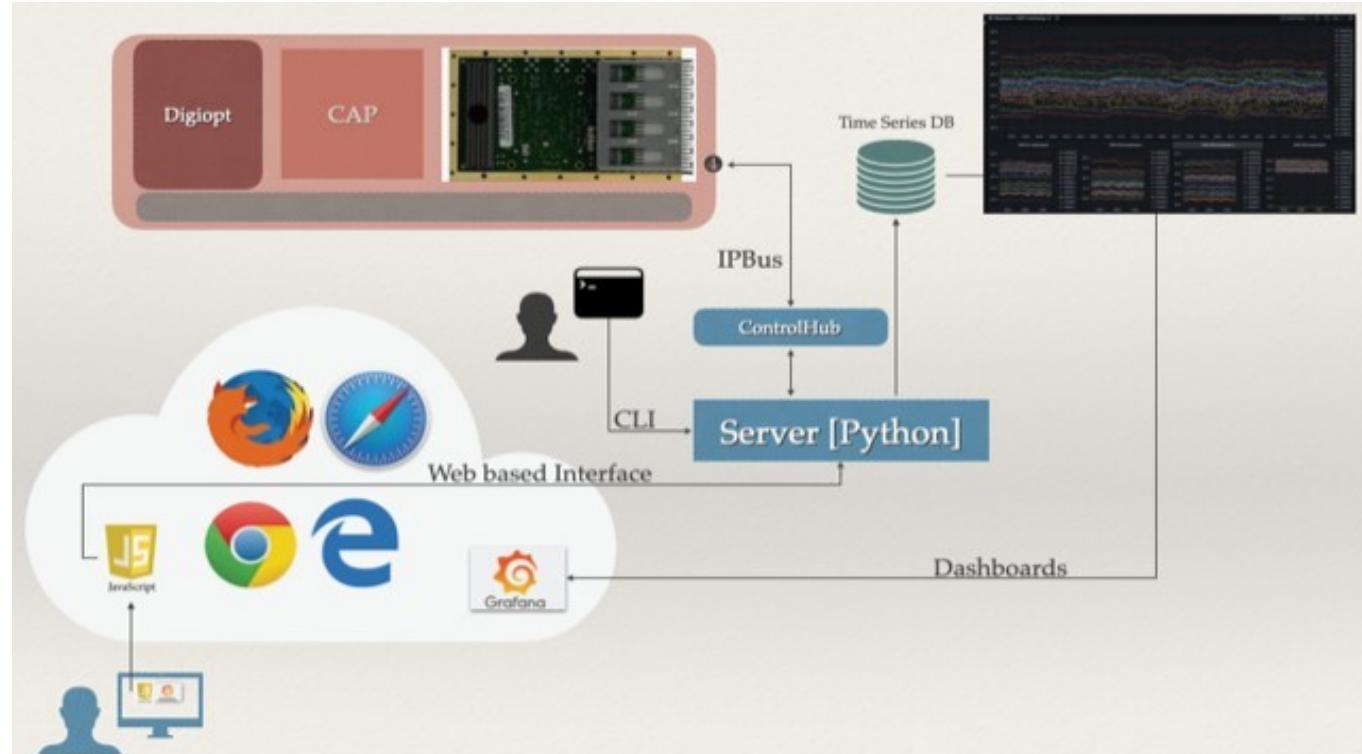

AGATA Week 2023

Summary

- Software Architecture
- Web site main page and crystal views
- Interface with TopologyManager
- Functionalities
 - Crystals selection
 - Parameter values management
 - Actions on cards
 - Interoperability
 - Administration
- Data model used by the software
- Docker container containing the installation

Software Architecture

- Python 3 server
- Django framework
- GUI in a browser
- Console in a CLI
- Database InfluxDB
- REST API
- Connection to cards using IPBus & Controlhub
- Use of existant CMD_Test scripts (from Gustav Vinther-Jørgensen)

Planisphere

2D projection

- AGATA polyhedron : [Icosahedral Goldberg w3D](#)
 - 180 hexagons, 12 pentagons
- [Dual Geodesic Icosahedron Pattern 8](#)
- Coordinates of centers of Agata Triple Clusters
- [Mollweide projection](#)
 - λ = longitude, Φ =latitude
 - θ given by equation:
$$2\theta + \sin 2\theta = \pi \sin \varphi$$
 - Limit of convergent sequence:

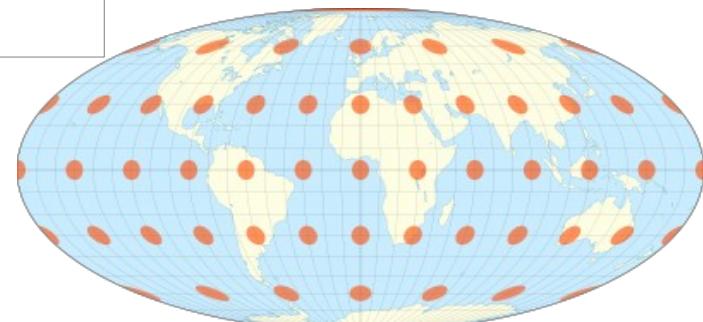

$$\theta_0 = \varphi,$$

$$\theta_{n+1} = \theta_n - \frac{2\theta_n + \sin 2\theta_n - \pi \sin \varphi}{2 + 2 \cos 2\theta_n}.$$
- The 3 hexagons of each ATC stay together

$$x = R \frac{2\sqrt{2}}{\pi} (\lambda - \lambda_0) \cos \theta,$$

$$y = R\sqrt{2} \sin \theta,$$

Interface with TopologyManager

- TM gives information about available STARE cards

```
{"connections": [
```

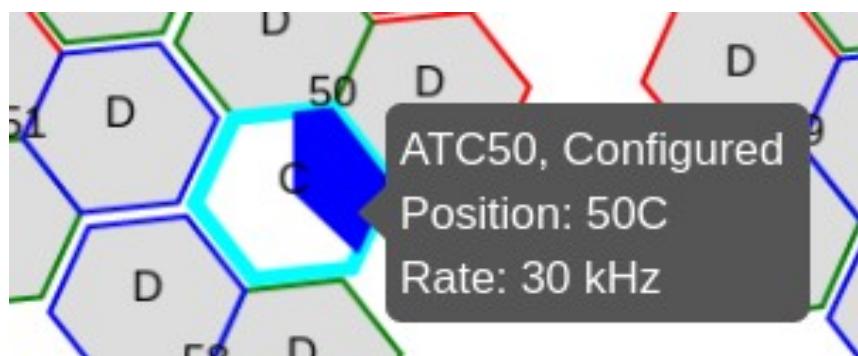

```
    {  
        "id": "stare.0",  
        "uri": "chtcp-2.0://10.81.17.221:10203?target=10.81.17.157:50001",  
        "address_table": "file:///... /Stare.Utility/STARE.xml",  
        "cluster": "ATC01",  
        "position": 11,  
        "crystal": "A", ...  
    },  
    ...  
}
```

Functionalities

- Crystals views (List, Circles, Planisphere)
- Crystal selections functions (Clear, Load from a list, Save, Delete)
- Configuration functions (Display from base, Read from cards, Write, Ipbus Parameters tree)
- Actions on crystal sets or individual crystals (FSM transitions, launch CMD_Test functions)
- User profile modification (username, email, first name, last name, password)
- Administrator functions on
 - Users, user groups, permissions
 - database objects : Card selections, Cards, Configurations, Monitor periods, Parameter groups, Parameter selections, Parameters, Values

Crystals selection

- Each user has his own selections
- Can be stored in a list
- Current selection stored
- Selections kept when switching view and after logout
- Crystal description in a tooltip

Parameter values

- Parameter configurations can be:
 - Displayed from base
 - In a tree view
 - In HTML forms
 - Written into cards
 - Read from cards
 - Imported from file
 - Exported to file
 - Monitored
 - Read periodically
 - Stored into InfluxDB database

Parameters	Address	Mask	Value	Write	Read	Monitor
▶ udp_0	-	-	-			
▶ aurora_a	-	-	-			
▶ data_manager_0	-	-	-

▶ N_SLV_PACE_HBRD	-	-	-			
▶ N_SLV_PACE_TDC	-	-	-			
▶ TEST	-	-	-			

HTML Forms

- Parameter selection ↔ HTML template file
- Subsets of parameters
- Allows to:
 - Display, Read, Write
- Available HTML controls:
 - Numerical edit zones
 - ▼ combo boxes
 - ☒ Checkboxes
 - Radio buttons

Number: 30

Combobox: Configured

Checkbox:

Radio 1st choice:

Radio 2nd choice:

Radio 3rd choice:

Radio 4th choice:

Read from Card Write into Card

```
<input id="idRate" type="number" name="N_SLV_HLTH.liveRate.rate"  
value="{{N_SLV_HLTH.liveRate.rate}}" size="4">
```

Actions

Configure

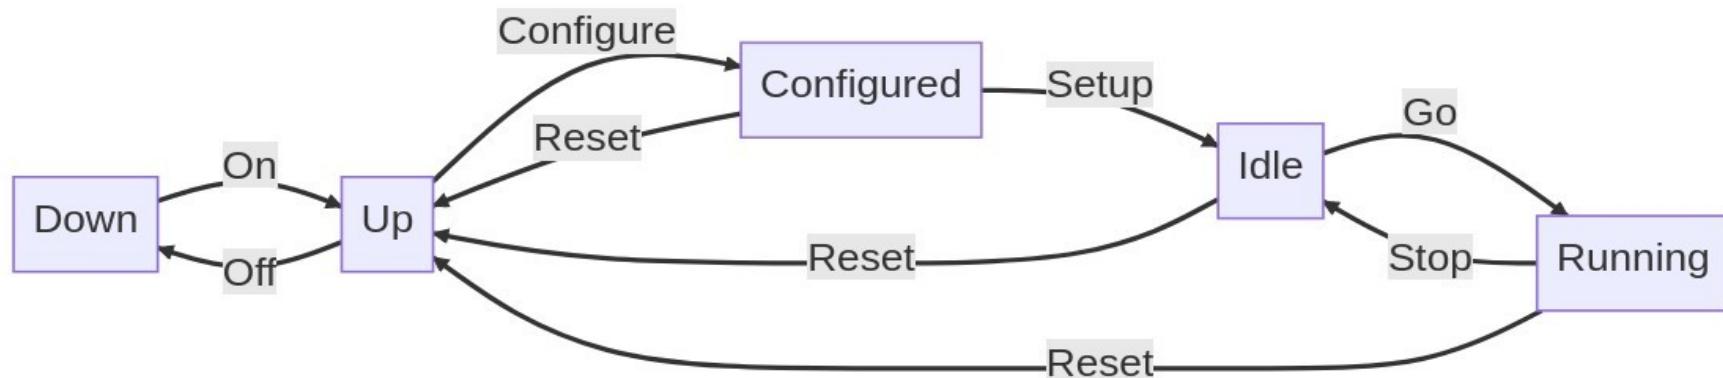

Setup

Go

Stop

Reset

- Can be launched on selections of cards
- Finite State Machine transitions

- Total counts are refreshed

CMD_Test actions

- 140 python functions in CMD_Test.py
- Descriptions provided in tooltips
- Output is displayed with colors
- History of action results

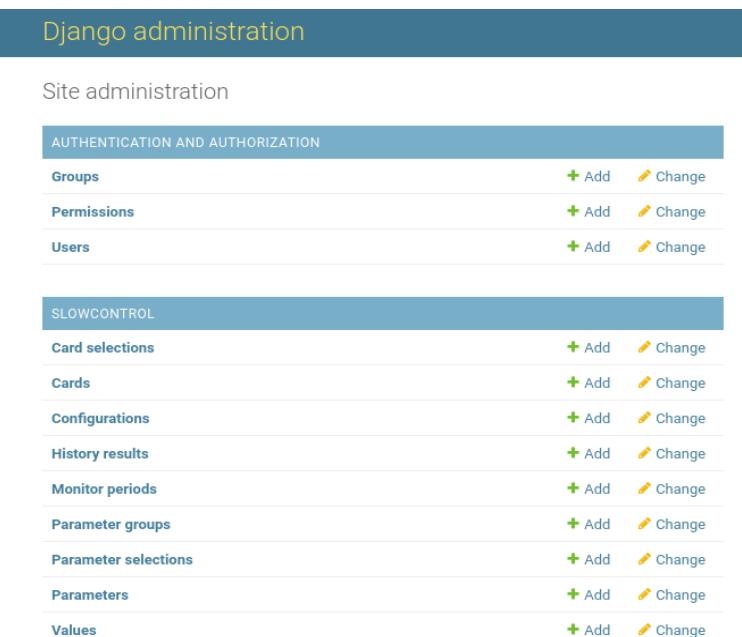

Action results of all cards				
Date	Time	Card	Action	Result
2023-09-05	14:37:52	stare.152(152)	PACE_GTS_stat	GTS status - Crystal 0
2023-08-31	15:40:05	stare.152(152)	read_idbitstream	[GTS enabled]
2023-08-31	15:38:30	stare.152(152)	read_idbitstream	IDLE period disabled Comma period disabled
2023-08-31	15:06:33	stare.152(152)	PACE_QuadLink_runOne	Led duration: 0 - Rate duration: 0 Trigger to capture time: 0 ns
2023-08-31	15:06:26	stare.152(152)	PACE_HLTH_live	

Interoperability

- Console mode
 - Choose card by position
 - `csl.launchActionCard(<position 0-59>, <crystal 'A' or 'B' or 'C'>, <action>, <args>)`
 - Stores action result in history
- REST Application Programming Interface
 - Parameters tree in JSON format
 - Read / Write values from parameter path
 - Can be tested in the web browser

Administration

- Uses Django administration GUI
- More user friendly than PHPMyAdmin
- Allows data Importation / Exportation
- Accessed only by administrator privileged users

Django administration

Data model

Entity-relation diagram:

11 entities, 17 tables

Docker container

- Base on Debian 10 (buster)
- Databases
 - Connection to external MySQL
 - Connection to external InfluxDB
- IPBus v2.8.3 compiled from source
- Python 3.7
- Django 2.2.28 with modules:
 - mysql-connector-python, python-statemachine, django-simple-menu, influxdb-client, djangorestframework, django-import-export
