

PTOLEMY Collaboration Meeting

Monday, 26 June 2023 - Tuesday, 27 June 2023

LNGS

Book of Abstracts

Contents

Welcome	1
Overview on the PTOLEMY project	1
Social Dinner Downtown	1
Lorentz4 and analyses code development (Nicola)	1
Measurement of electron transport with Princeton magnet (Mark,Andi)	1
Simulation of transfer function with analytical functions in Lorentz4 (Wonyong,Chris)	1
Study of bound states in tritium decay (Angelo + student)	1
Comments on coherent effects (Angelo + Guglielmo)	1
Calculator of Fullerene encapsulation (Valentina Tozzini)	2
Updates from Roma Tre: Graphene breaking, H-source commissioning, NPG hydrogenation(Alice)	2
Status of tritiated graphene (Gianluca/Carlo)	2
Graphene activities in Amsterdam (Nicolo', Radboud University Nijmegen)	2
Electrostatic analyser for electrons (Alessandro/Postdoc)	2
RF measurement with electron form 83mKr(Federico)	2
Direct e-gun injection into filter (Chris)	2
CNT Field emission for cryo electron source (Francesco / Andrei)	2
CNT hydrogenation (Carlo)	3
Report from the ASG/Suprasys companies (Santiago/Matteo)	3
Global demonstrator design assembly (Alfredo/Ilaria)	3
Antenna simulation studies (Andi)	3
RF work at Nikhef (James / Saad)	3
Front-end and digital electronic (Guido)	3
General discussion on future plan to build and run the demonstrator	3

Budget status and strategy	3
Future papers	3
TES Development (Hobey)	4
Lorentz4 and analyses code development (Nicola)	4
Measurement of electron transport with Princeton magnet (Mark,Andi)	4
TES development (Hobey)	4
Lorentz4 and analyses code development (Nicola)	4
Measurement of electron transport with Princeton magnet (Mark, Andi)	4
Simulation of transfer function and improved analytical understanding of filter (Wonyong)	4
Welcome	4
Welcome	5
Welcome	5
QTNM project: Quantum Technologies for Neutrino Mass (Seb Jones, University College London)	5
Lorentz4 and analyses code development (Nicola)	5
Measurement of electron transport with Princeton magnet (Mark, Andi)	5
Simulation of transfer function and improved analytical understanding of filter (Wonyong)	5
Report from the ASG/Suprasys companies (Santiago/Matteo)	5
Global demonstrator design assembly (Alfredo/Ilaria)	5
Lorentz4 and analyses code development (Nicola)	6
Measurement of electron transport with Princeton magnet (Mark, Andi)	6
Simulation of transfer function and improved analytical understanding of filter (Wonyong)	6
Carbon Nanotubes as Cold Electron Source (F. Pandolfi)	6

Welcome session / 1

Welcome

Welcome session / 2

Overview on the PTOLEMY project

3

Social Dinner Downtown

Full chain simulation of the transfer function / 4

Lorentz4 and analyses code development (Nicola)

Full chain simulation of the transfer function / 5

Measurement of electron transport with Princeton magnet (Mark,Andi)

Full chain simulation of the transfer function / 6

Simulation of transfer function with analytical functions in Lorentz4 (Wonyong,Chris)

Theory / 7

Study of bound states in tritium decay (Angelo + student)

Theory / 8

Comments on coherent effects (Angelo + Guglielmo)

Theory / 9

Calculator of Fullerene encapsulation (Valentina Tozzini)

Graphene / 10

Updates from Roma Tre: Graphene breaking, H-source commissioning, NPG hydrogenation(Alice)

Graphene / 11

Status of tritiated graphene (Gianluca/Carlo)

Graphene / 12

Graphene activities in Amsterdam (Nicolo', Radboud University Nijmegen)

Electron Source and detectors / 13

Electrostatic analyser for electrons (Alessandro/Postdoc)

Electron Source and detectors / 14

RF measurement with electron from ⁸³mKr(Federico)

Electron Source and detectors / 15

Direct e-gun injection into filter (Chris)

Electron Source and detectors / 16

CNT Field emission for cryo electron source (Francesco / Andrei)

Electron Source and detectors / 17

CNT hydrogenation (Carlo)

Demonstrator / 18

Report from the ASG/Suprasys companies (Santiago/Matteo)

Demonstrator / 19

Global demonstrator design assembly (Alfredo/Ilaria)

RF detection / 20

Antenna simulation studies (Andi)

RF detection / 21

RF work at Nikhef (James / Saad)

RF detection / 22

Front-end and digital electronic (Guido)

General discussion / 23

General discussion on future plan to build and run the demonstrator

General discussion / 24

Budget status and strategy

General discussion / 25

Future papers

TES / 28

TES Development (Hobey)

29

Lorentz4 and analyses code development (Nicola)

30

Measurement of electron transport with Princeton magnet (Mark,Andi)

31

TES development (Hobey)

32

Lorentz4 and analyses code development (Nicola)

33

Measurement of electron transport with Princeton magnet (Mark, Andi)

34

Simulation of transfer function and improved analytical understanding of filter (Wonyong)

RF detection / 35

Welcome

Electron Source and detectors / 36

Welcome

37

Welcome

38

QTNM project: Quantum Technologies for Neutrino Mass (Seb Jones, University College London)

39

Lorentz4 and analyses code development (Nicola)

40

Measurement of electron transport with Princeton magnet (Mark, Andi)

41

Simulation of transfer function and improved analytical understanding of filter (Wonyong)

Demonstrator / 42

Report from the ASG/Suprasys companies (Santiago/Matteo)

Demonstrator / 43

Global demonstrator design assembly (Alfredo/Ilaria)

Simulation and software / 44

Lorentz4 and analyses code development (Nicola)

Simulation and software / 45

Measurement of electron transport with Princeton magnet (Mark, Andi)

Simulation and software / 46

Simulation of transfer function and improved analytical understanding of filter (Wonyong)

47

Carbon Nanotubes as Cold Electron Source (F. Pandolfi)
