CTAO

# The next generation high-energy gamma-ray observatory

- The first ground-based gamma-ray **observatory**
- Two array sites to provide **full-sky coverage**
- Increased detection area and improved sensitivity
- 3 telescope designs to span over the broadest energy range amongst IACTs
  - **From ~20 GeV to ~300 TeV**

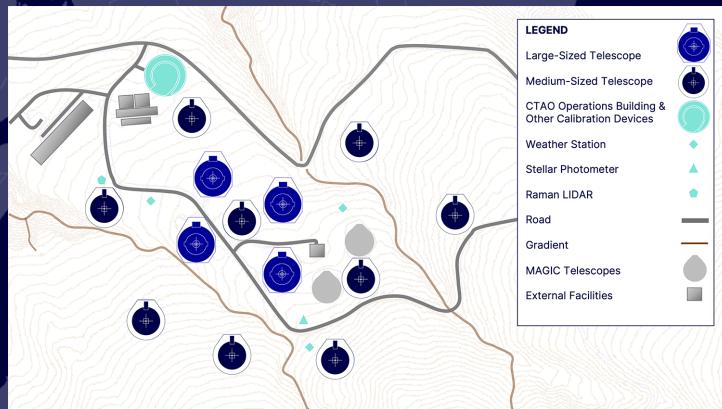

**CTAO South**  
Paranal, Chile  
 $\sim 3 \text{ km}^2$  area

**Science Data Management Centre**  
Zeuthen, Germany

**Headquarters**  
Bologna, Italy

**CTAO North**  
La Palma, Spain  
 $\sim 0,25 \text{ km}^2$  area

# CTAO telescopes

MST

Core energy range

SST

100 TeV range  
exploration

4.3 m

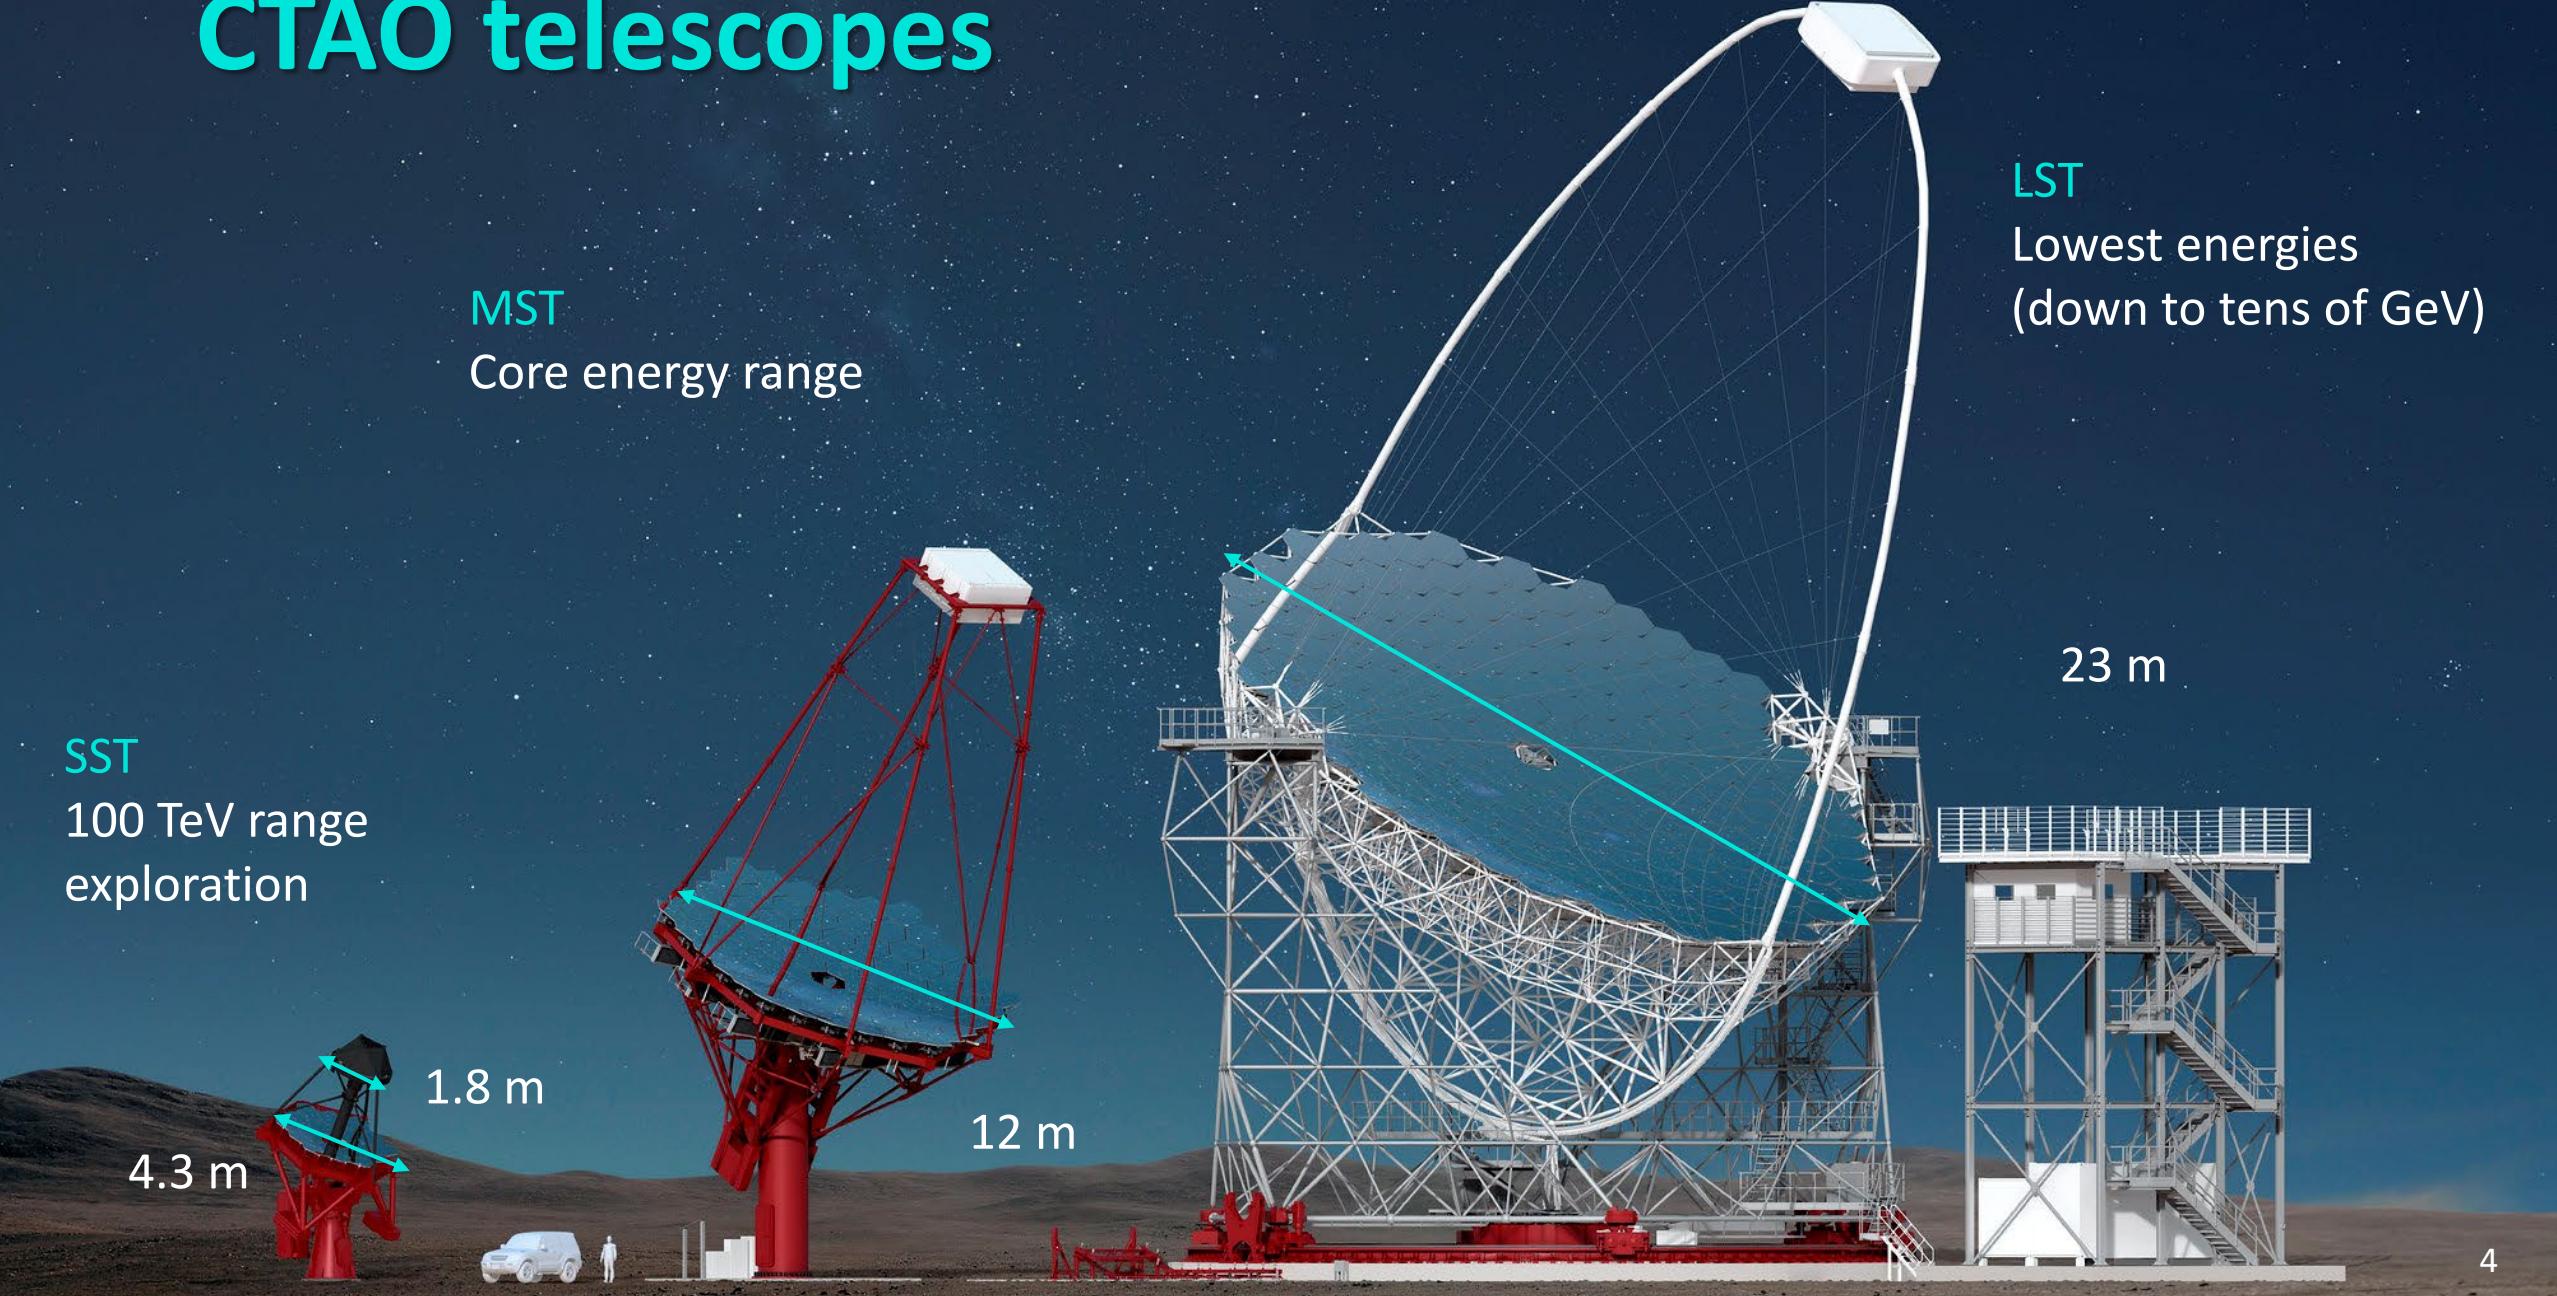

1.8 m

12 m

23 m

LST

Lowest energies  
(down to tens of GeV)

# CTAO telescopes

SST

SiPM camera

2048 pixels

8.8° FoV

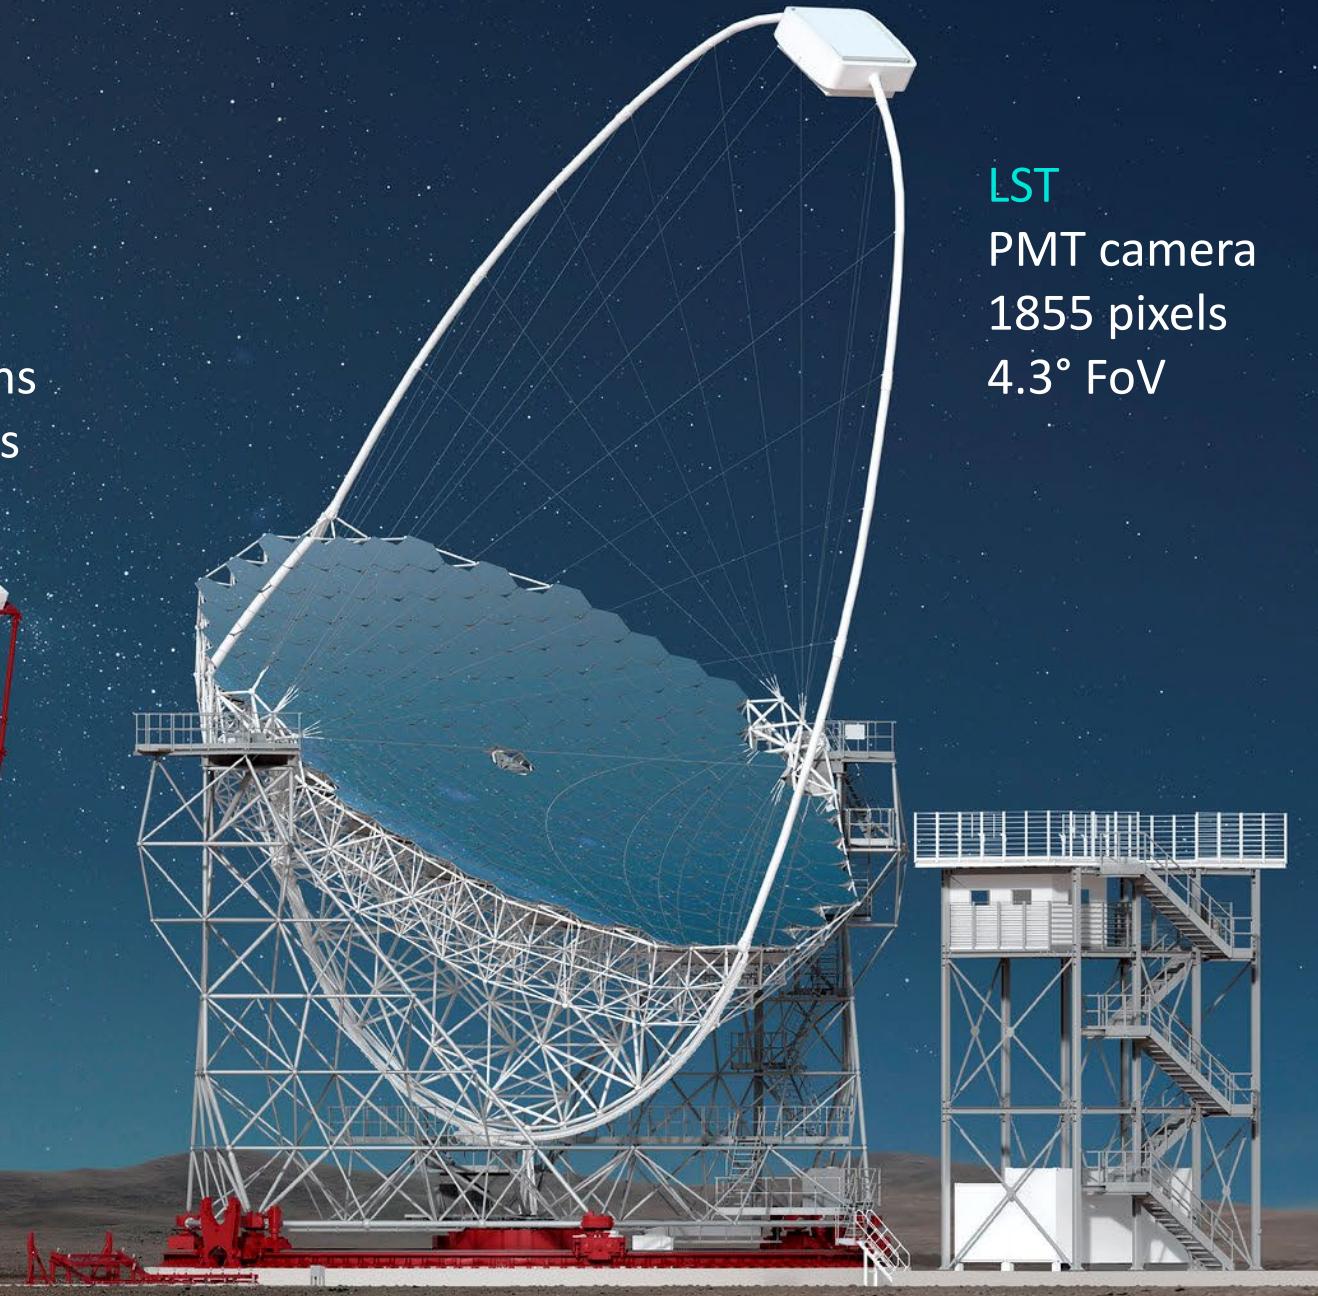

MST

PMT camera with 2 designs

- NectarCAM 1855 pixels
- FlashCam 1764 pixels

8° FoV

LST

PMT camera

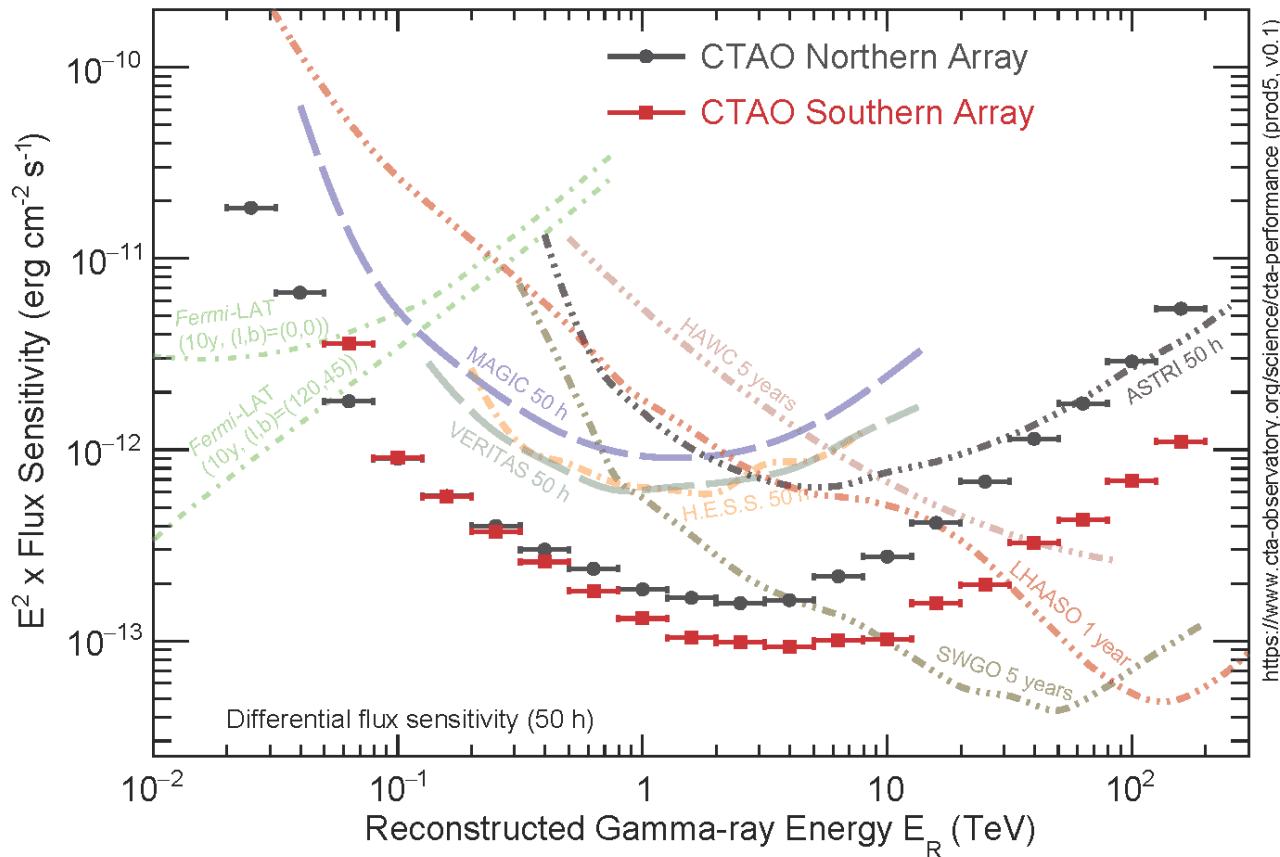

1855 pixels

4.3° FoV

# CTAO

**The first (open) Observatory in the TeV energy range**

**Revolution in the TeV science**

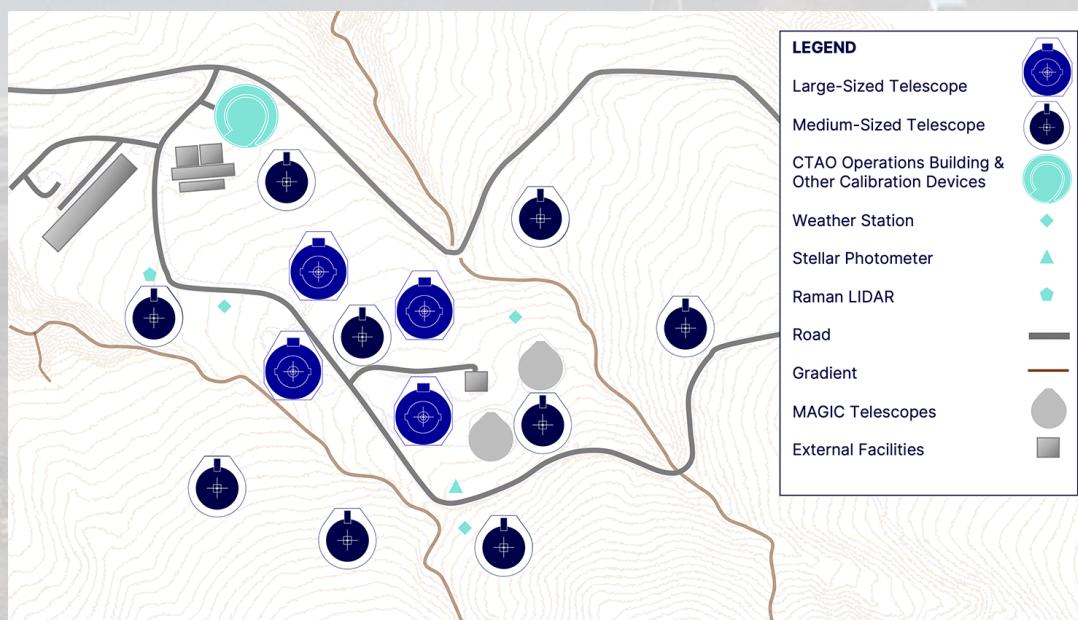

# CTAO 'alpha' configuration

## CTAO North

4 LSTs

9 MSTs

## CTAO South

14 MSTs

37 SSTs

**NO LST!**

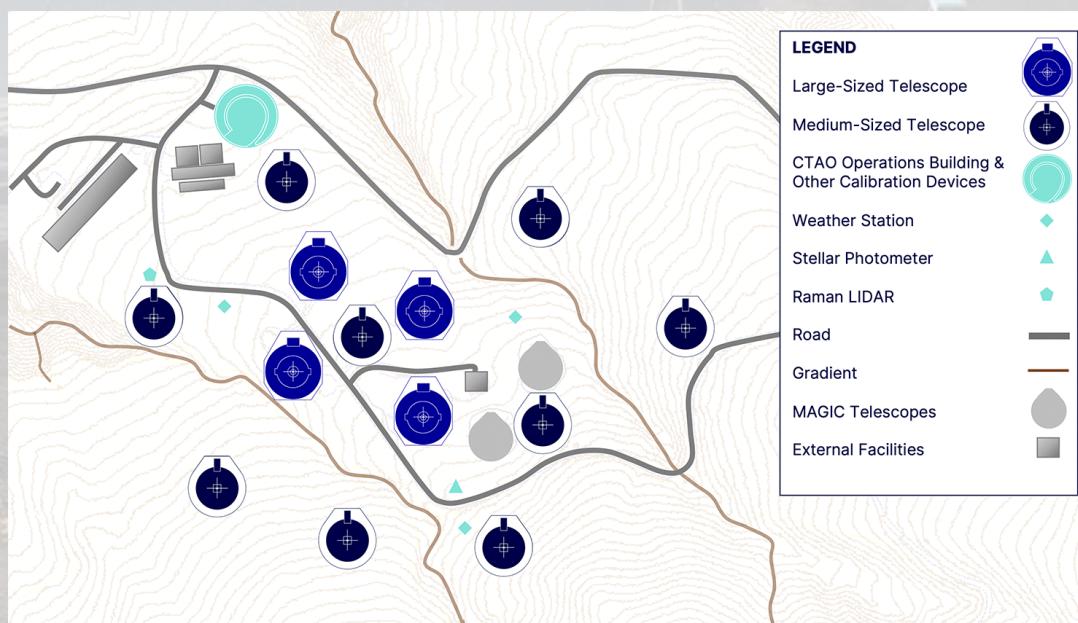

# CTAO 'alpha' configuration + CTAPLUS

**CTAO**

## CTAO North

4 LSTs

9 MSTs

## CTAO South

14 MSTs

37 SSTs

**2 LSTs + 5 SSTs**

## The CTA+ program

- CTA+ is an Italian program funded by PNRR to enhance the CTAO infrastructure of the CTAO southern array
- ~ 70 M€
- INAF leadership with co-participation of INFN and several Universities
- Main goals:
  - Enhance CTAO southern array at the lowest (< 100 GeV) and highest (> tens TeV) energies
  - Improve multi-messenger facilities for a better synergy with CTAO
  - Science and outreach program with CTAO
  - R&D activities: new detectors for Cherenkov telescopes or complementary

## LST-South workflow

- Mount to be adapted to cope with CTAO-S site conditions
- Camera, optics and auxiliaries will be as in LST-North

## LST-South tender situation

- Several tenders delayed due to administrative issues
- However:
  - Delivery times are (often) shorter than expected
  - CTA+ has been extended (expected end of the project June 2025 → Dec 2025)

# Conclusions

- CTA+ will improve the performance and the scientific outcome of the CTAO-South array
  - 2 LSTs and 5 SSTs
- Multi-wavelength instrument optimization
  - Electromagnetic follow-up of CTAO sources @ low energies
  - End-to-end prototype for optical intensity interferometry
- R&D program for future CTAO detectors and ancillary instrumentations
