Collaborative Tools
Status report

A. Gianoli for the CollabToolsPeople (Castelli, Dal Pra, Donati, Pellegrini, Stroili, …)

Which Tools

- Directory service (LDAP)

- Mailing lists (sympa)

- Documents library (cds invenio)

- Code library (GForge)

- Wiki (?)

LDAP

- tested on a pc

- agreement on tree structure

- ready to populate

  ...BUT...

- need registration procedure

Sympa

- easy integration with LDAP

- tested on virtual machine

- need proper machine

Invenio

- installed standalone on test pc

- integration with LDAP is going on

- proper machine needed

GForge

- integration with LDAP not easy & not complete

- work going on: no time est.

- considering alternatives:

  - standalone gforge

  - svn integrated with LDAP

Wiki

- relatively new request

- just started looking around

- MediaWiki seems promising (support for LDAP)

- right now a bit busy with previous tools
