

NR-EOB comparison

EOB@Work 2023: Fall Meeting

Torino, October 16, 2023

J. Trenado, T. Andrade, A. Climent

Comparison EOB - ICC/RIT/MAYA/SXS

- **example plots of very different waveform**
- **plot of initial data in (E_0, J_0) plane, superpose NR pts on EOB prediction plots**
- **encounter histogram plot (see Nagar+ 2021)**
- **example plot with EOB potential and different orbits**
- **mismatch summary plots for all data (eccentric, dynamical encounter, scattering from BCN, RIT, SXS etc)**
- **table of scattering angles (Nagar-Hopper references)**

ICC catalogue

223 simulations

- **E0_ADM range: 0.9951 – 0.9998**
- **J0_ADM: 0.6169 – 1.1548**
- **Mass ratio: 1 – 1.95**
- **Chi: -0.5 – 0.5**
- **Initial separation: 40M**

• **Three general sets**

q	χ	# sims
1	0	37
1	-0.5 – 0.5	91
1.25 – 1.95	0	95

RIT catalogue

457 selected simulations

- $E0_ADM$ range: 0.9790 - 0.9991
- $J0_ADM$: -0.5032 - 1.3259
- Mass ratio: 1 - 32
- Chi: -0.8 - 0.8
- Initial separation:
11.33M - 24.75M

2nd Maya Catalogue

- Sep 2023 → Second Maya Catalogue
 - Total: 181 waveforms
 - 55 with high mass ratio $q \geq 4$
 - 48 precessing
 - 92 eccentric ($e > 0.01$)

92 eccentric

- 80 waveforms
 - Mass ratio $1 \leq q \leq 4$ (by steps of 1)
 - Spins $a_1 = a_2 = \{0, 0.4\}$ aligned with J
 - $0.01 < e < 0.1$
- 5 waveforms
 - Mass ratio $q = 1$
 - Eccentricity up to $e = 0.6$
- 7 waveforms
 - Eccentricity and precession

$e = 0.004$

MAYA0911 / D9_q4_a1_-0.45_0.09_-0.65_a2_-0.05_0.04_-0.19_m436.36

MAYA0911 / D9_q4_a1_-0.45_0.09_-0.65_a2_-0.05_0.04_-0.19_m436.36

92 eccentric ($e > 0.01$)

- 80 waveforms
 - Mass ratio $1 \leq q \leq 4$ (by steps of 1)
 - Spins $a_1 = a_2 = \{0, 0.4\}$ aligned with J
 - $0.01 < e < 0.1$
- 5 waveforms
 - Mass ratio $q = 1$
 - Eccentricity (4 with $e < 0.3$ and 1 with $e = 0.6$)
- 7 waveforms
 - Eccentricity and precession $e < 0.2$

$e = 0.6$

MAYA093 / D24_q1_a1_0_0_0_a2_0_0_0_m240_e0.8

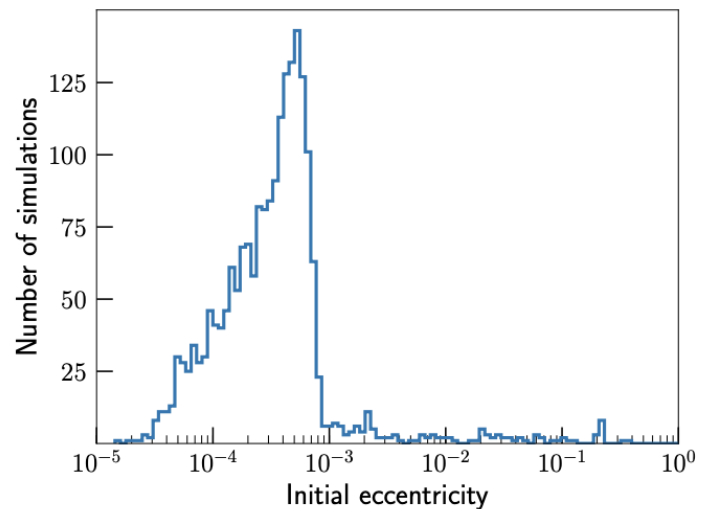

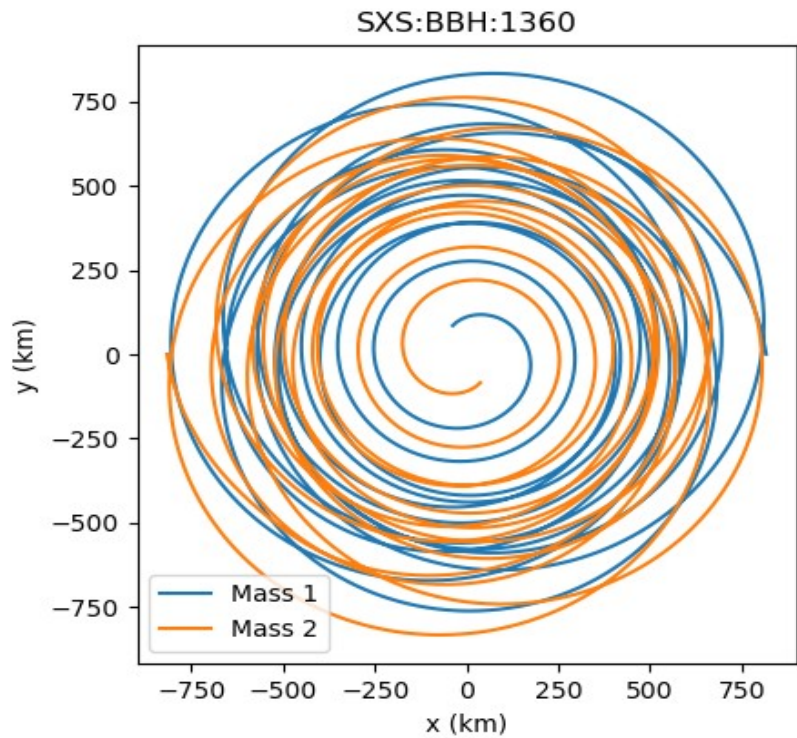

MAYA0936 / D24_q1_a1_0_0_0_a2_0_0_0_m240_e0.8

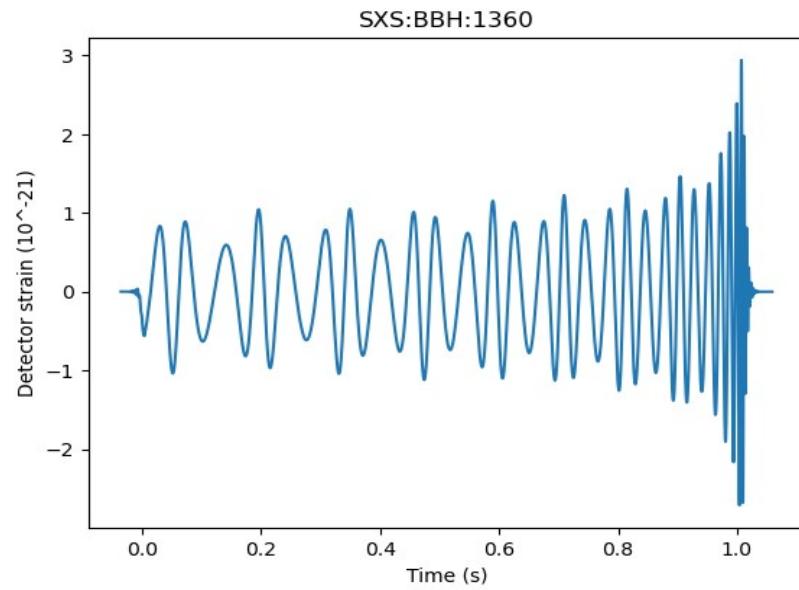

SXS Catalogue

- Sep 2019 → SXS Catalogue (arXiv:1904.04831v2)
 - Total: 2018 waveforms
 - $e_{\max} = 0.14$

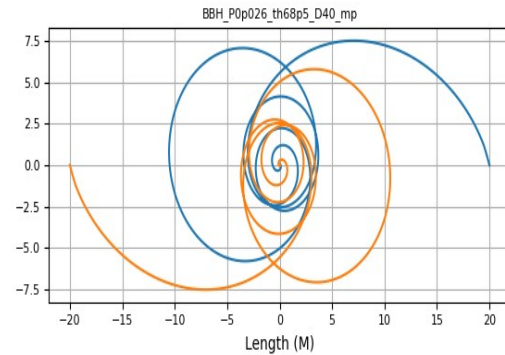

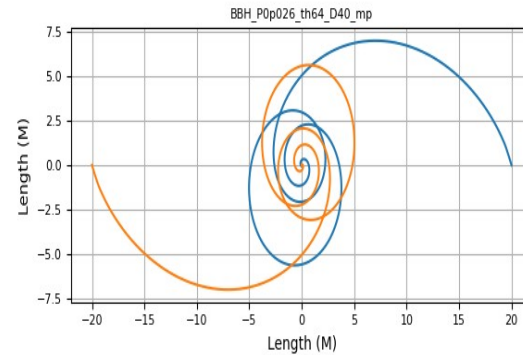

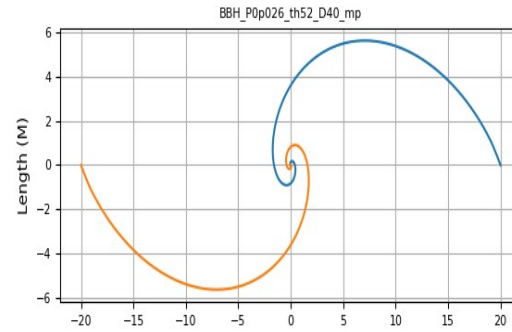

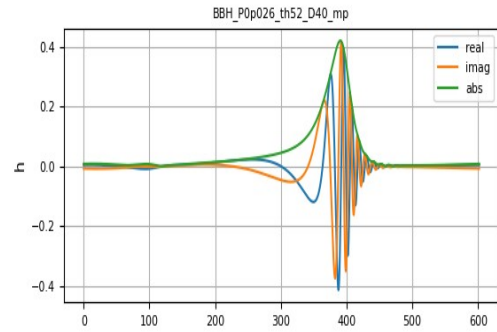

$$e_{\max} = 0.14$$

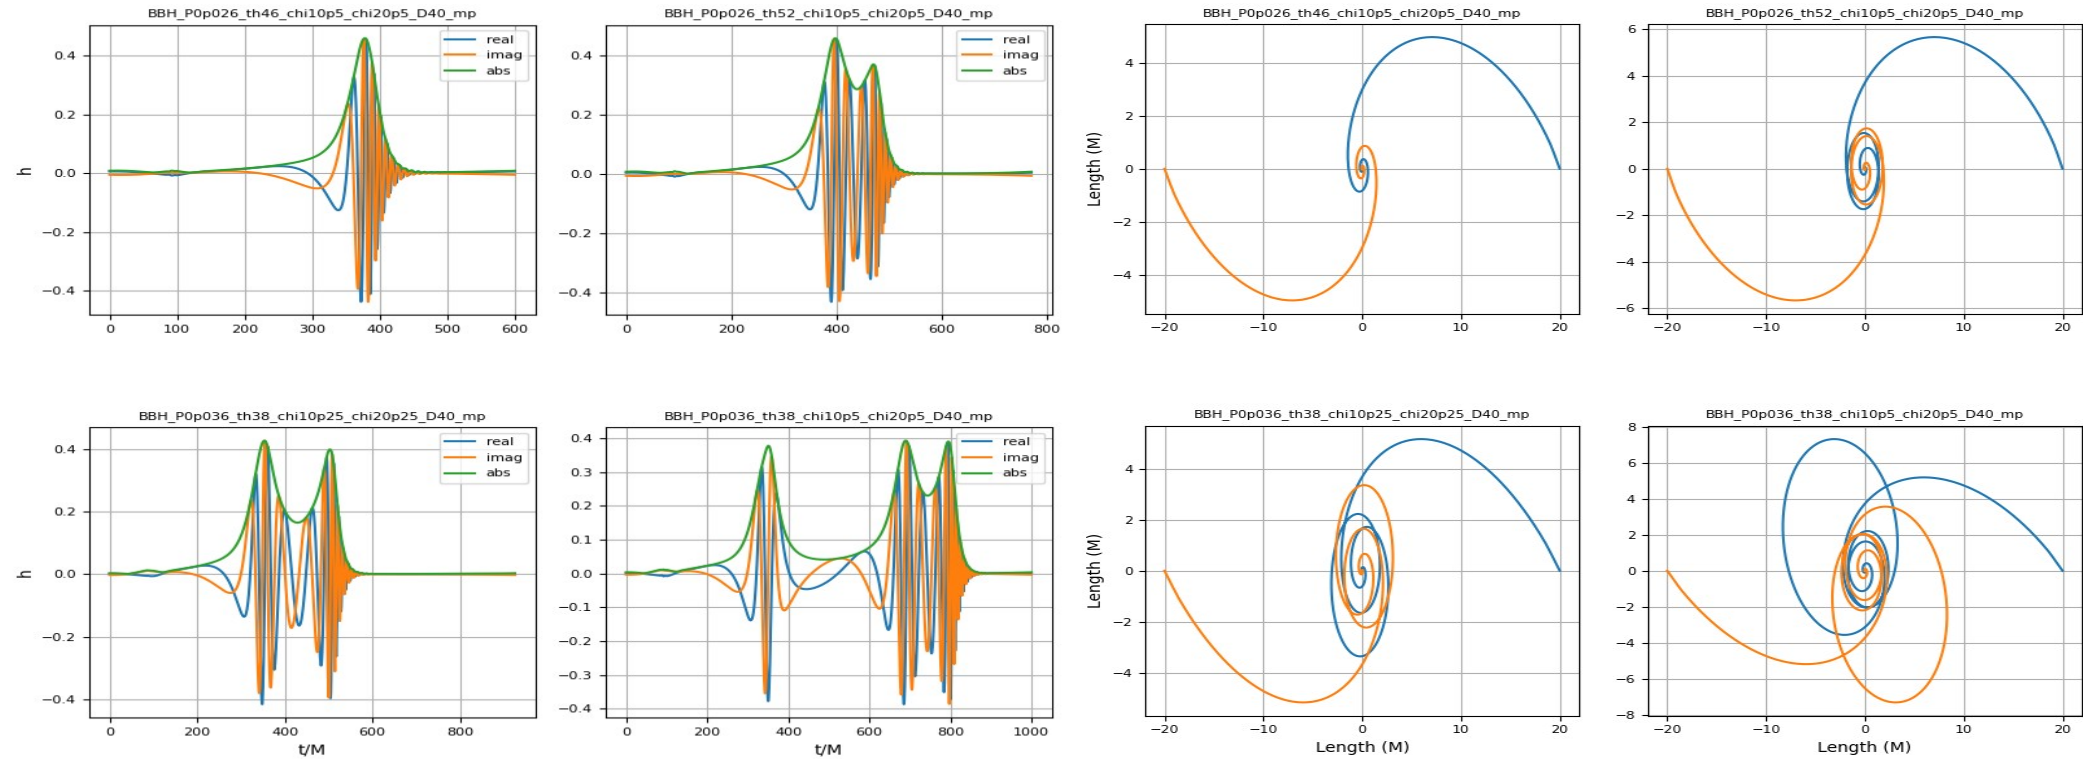

ICC Catalogue

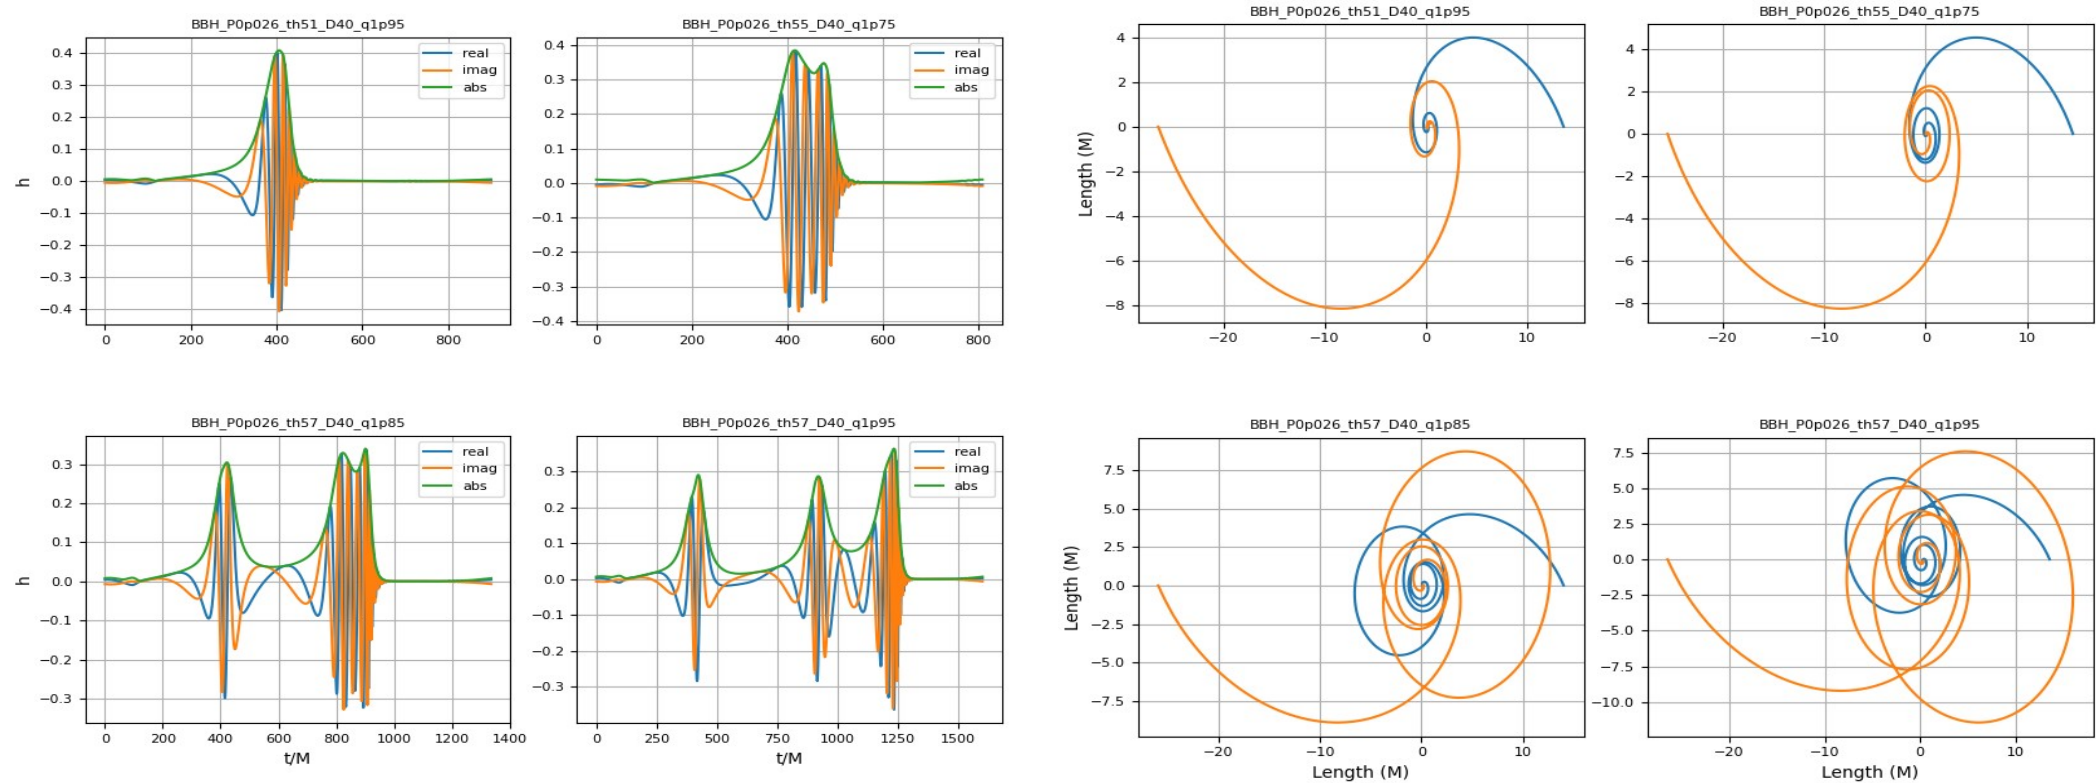

Examples of different waveforms ICC: $q=1$; spin=0

Examples of different waveforms ICC: $q=1$; $\text{spin} \neq 0$

Examples of different waveforms ICC: $q \neq 1$; spin=0

Encounters ICC-EOB. Algorithm.

- **Three different analysis**

1. Counting encounters using `abs(psi4)` in NR and `abs(strain)` in EOB
 - Scipy `find_peaks` with min. distance between peaks: 40M
2. Counting encounters using `abs(strain)` in NR and `abs(strain)` in EOB
 - Integration in NR using FFI with constant `f0=0.0023`
 - Scipy `find_peaks` with min. height=0.1 and min. distance between peaks: 40M and prominence=0.03
3. Countins encounters using `abs(strain)` in NR and `worb` in EOB
 - Integration in NR using FFI with constant `f0=0.0023`
 - For NR: Scipy `find_peaks` with min. height=0.1 and min. distance between peaks: 40M and prominence=0.03
 - For EOB: `find_peaks` through derivation of `worb`

Encounters ICC-EOB. Example of analysis

- **Two different analysis**

Only considering signals with $D=24.75M$

1. Counting encounters using `abs(strain)` in NR and `abs(strain)` in EOB
 - Integration in NR using FFI with constant $f_0=0.0023$
 - Scipy `find_peaks` with `min. height=0.3` and `min. distance between peaks: 40M`
2. Countins encounters using `abs(strain)` in NR and `worb` in EOB
 - Integration in NR using FFI with constant $f_0=0.0023$
 - For NR: Scipy `find_peaks` with `min. height=0.3` and `min. distance between peaks: 40M`
 - For EOB: `find_peaks` through derivation of `worb`

Encounters RIT-EOB. Totals

Algorithm	Set	# sims	Coincidence per set (%)	Total Coincidence (%) ⁽²⁾
NR(Psi4) - EOB(worb)	$0.5 \leq ecc < 0.6$	76	82,89%	76,60%
	$0.6 \leq ecc < 0.7$	105	72,38%	
	$0.7 \leq ecc < 0.8$	42	78,57%	
	$0.8 \leq ecc < 0.9$	42	73,81%	
	$0.9 \leq ecc < 1.0$	163	52,76%	
NR(h) - EOB(worb)	$0.5 \leq ecc < 0.6$	76	93,42% ⁽¹⁾	93,96%
	$0.6 \leq ecc < 0.7$	105	95,24%	
	$0.7 \leq ecc < 0.8$	42	95,24%	
	$0.8 \leq ecc < 0.9$	42	90,48%	
	$0.9 \leq ecc < 1.0$	163	80,37%
