Contribution ID: 150

Type: Oral

Quantum Computing for Nuclear Physics (Invited)

Tuesday, 27 February 2024 16:25 (30 minutes)

With the recent experimental realization of quantum computing devices containing tens to hundreds of qubits and fully controllable operations, the theoretical effort in designing efficient quantum algorithms for a variety of problems has seen a tremendous growth worldwide. In this talk I will discuss the potential impact of quantum computing for application in nuclear physics and present some recent results of quantum simulations for simple nuclear models on current generation devices.
