

CNS 5 and TT Highlights RomaTre Division

MUSA **passato prossimo**

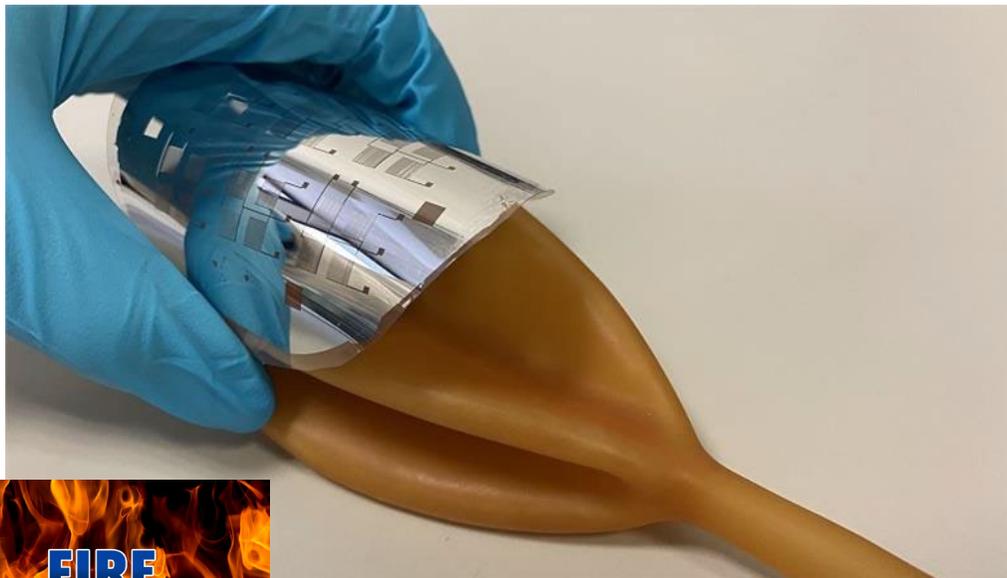

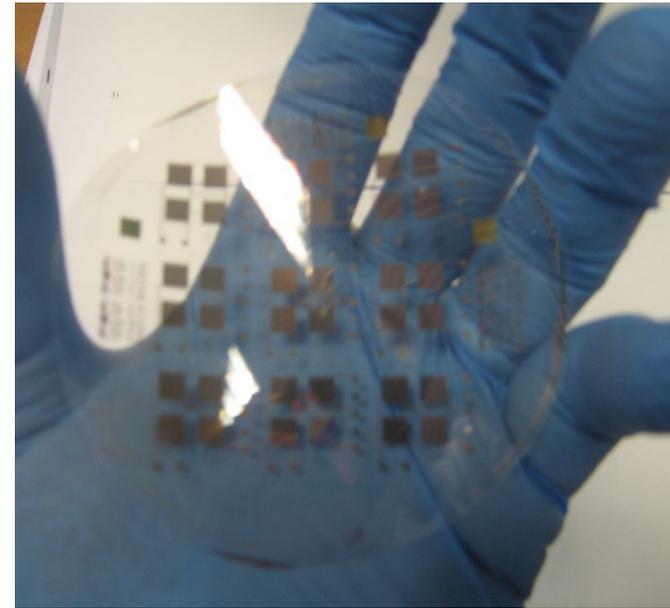

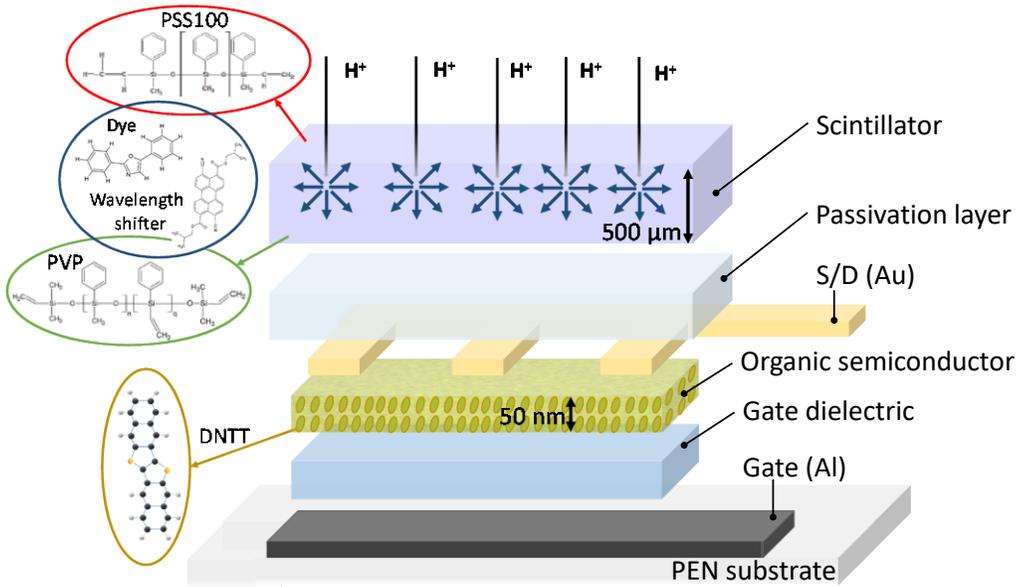

- „Personalmente ho provato il piacere più grande a contatto con le opere d'arte. Mi danno una felicità che non riesco a trovare altrove.“ (A. Einstein)
- “Succede tutto per una ragione” e quella ragione è la FISICA.....

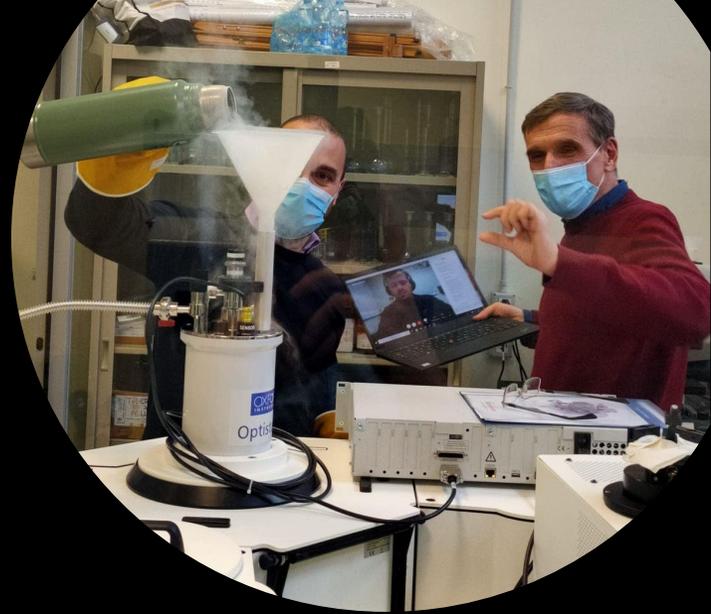

Musa: I musici

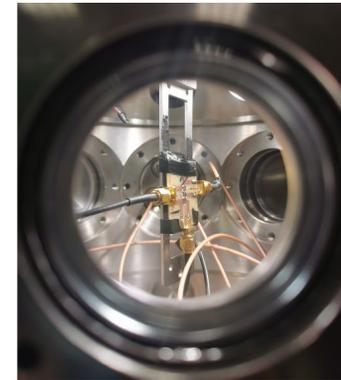

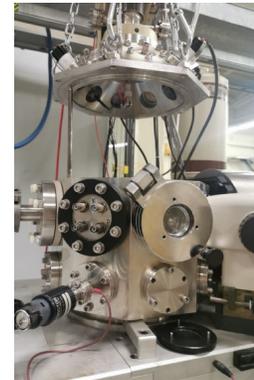

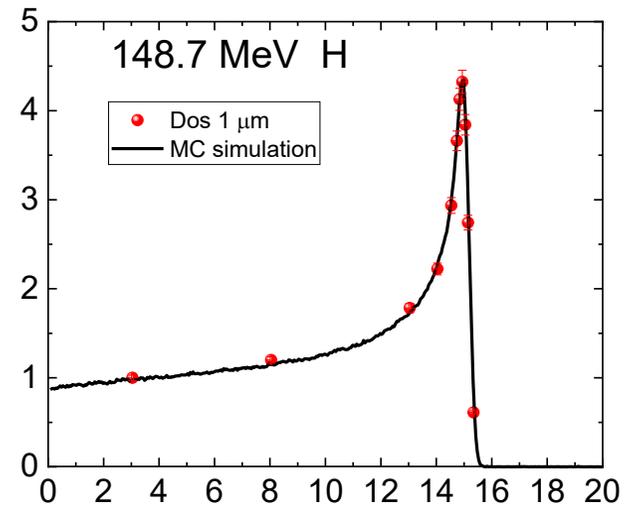

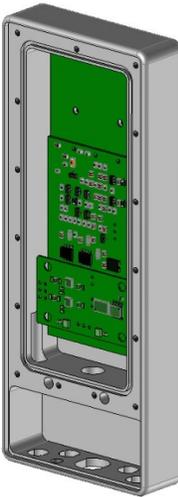

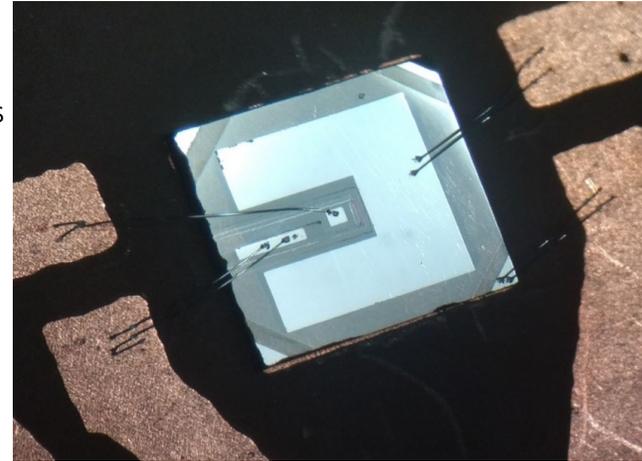

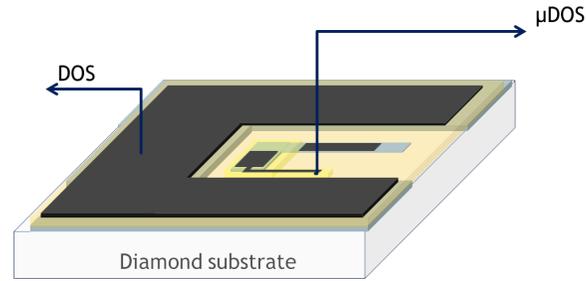

Fire:
firemen/firewomen

WomenInScience

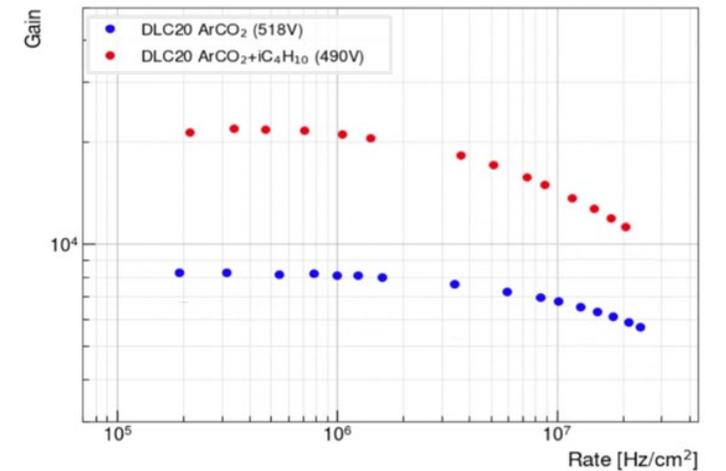

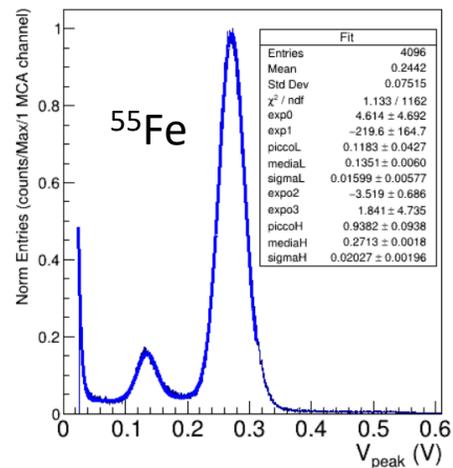

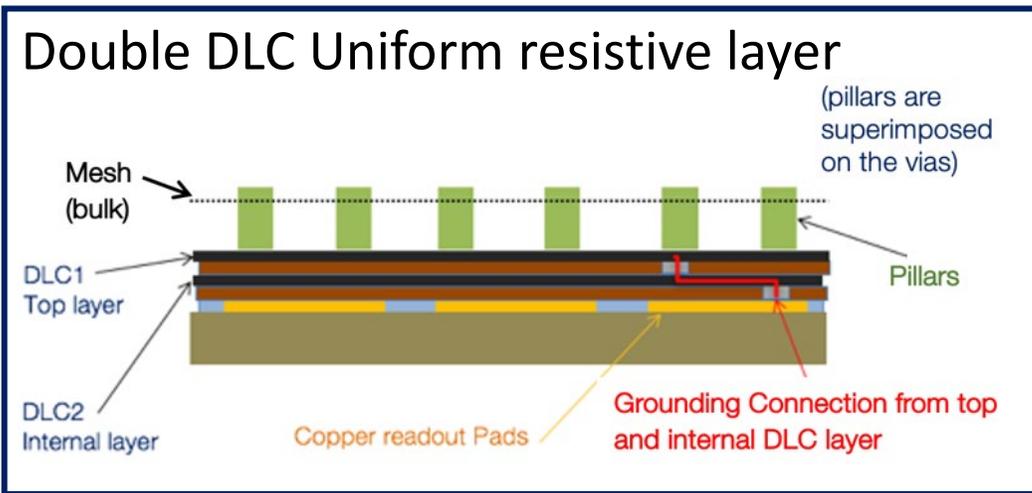

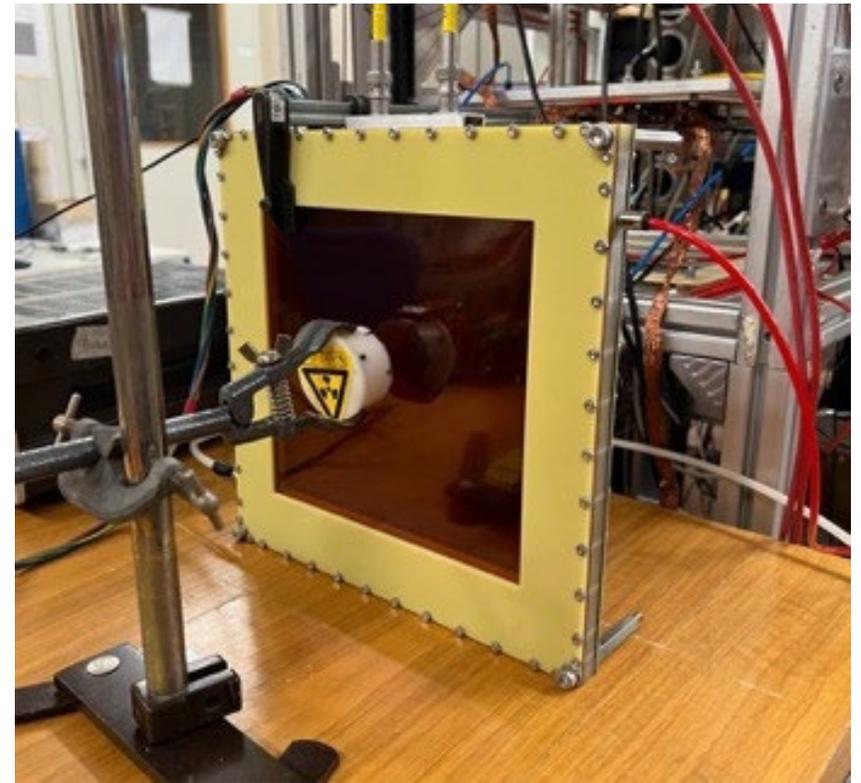

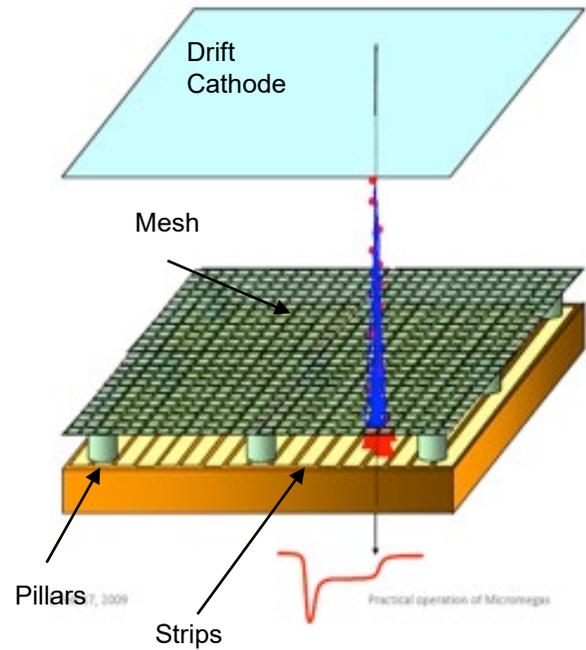

DIODE - Diamond Integrated devices fOR hadronThERapy (il presente)

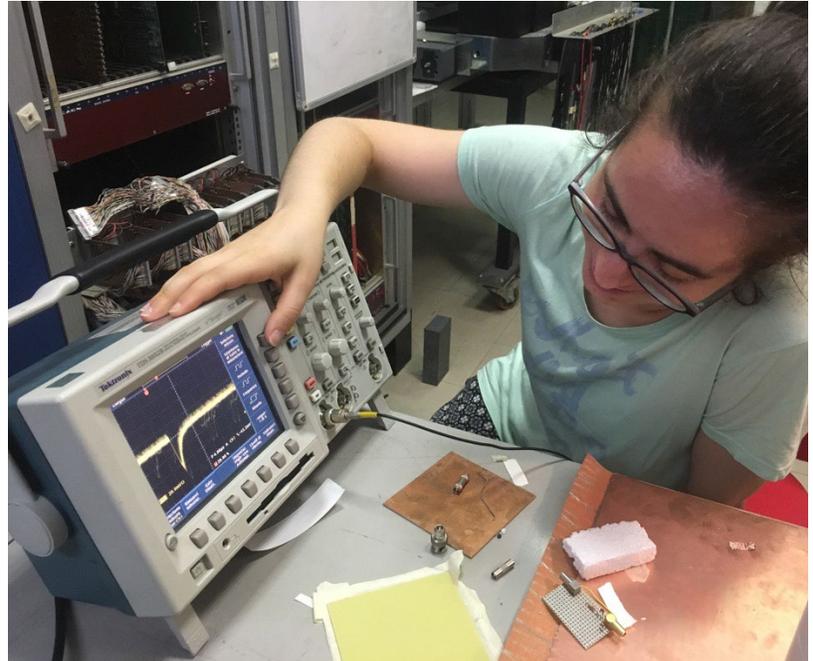

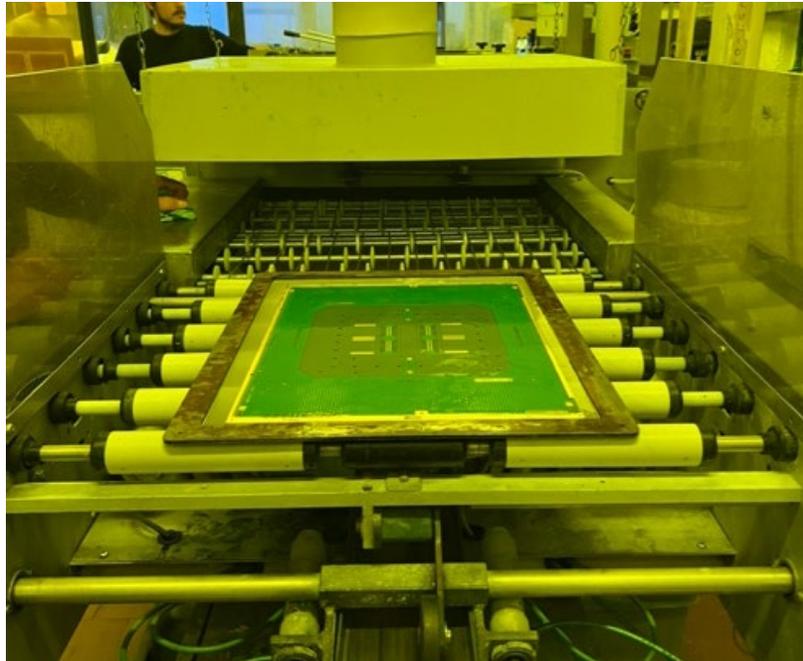

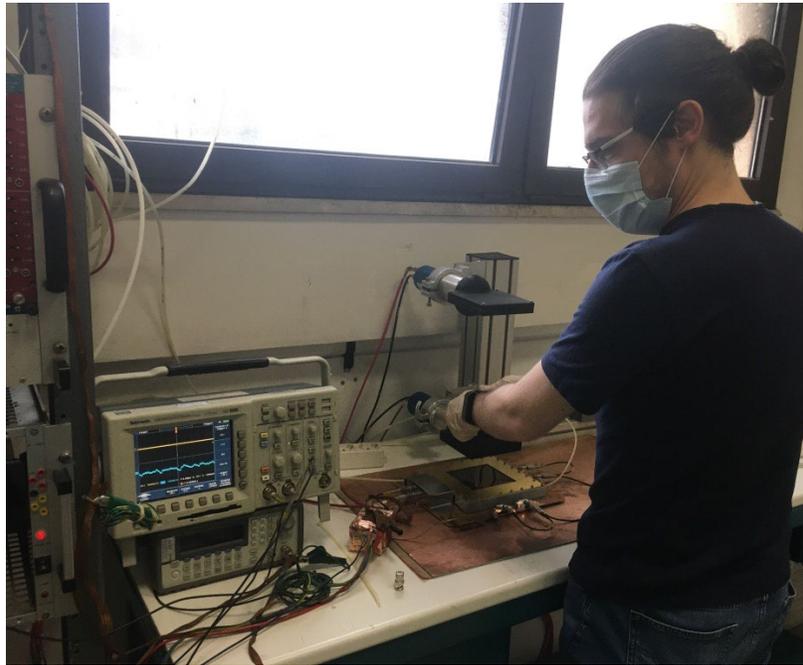

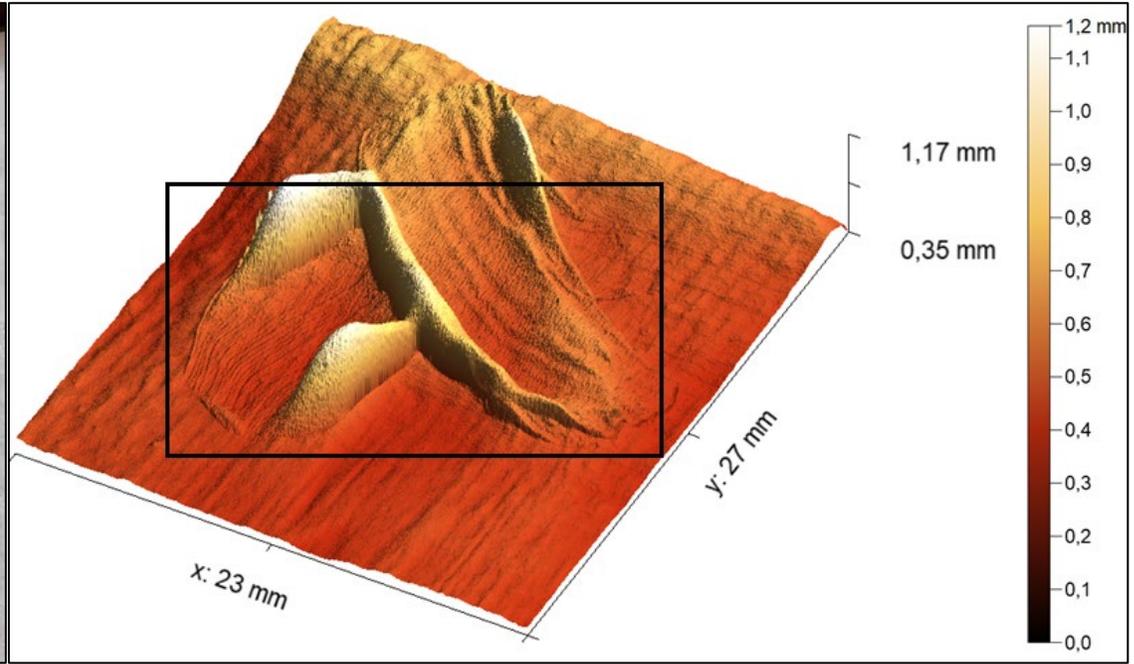

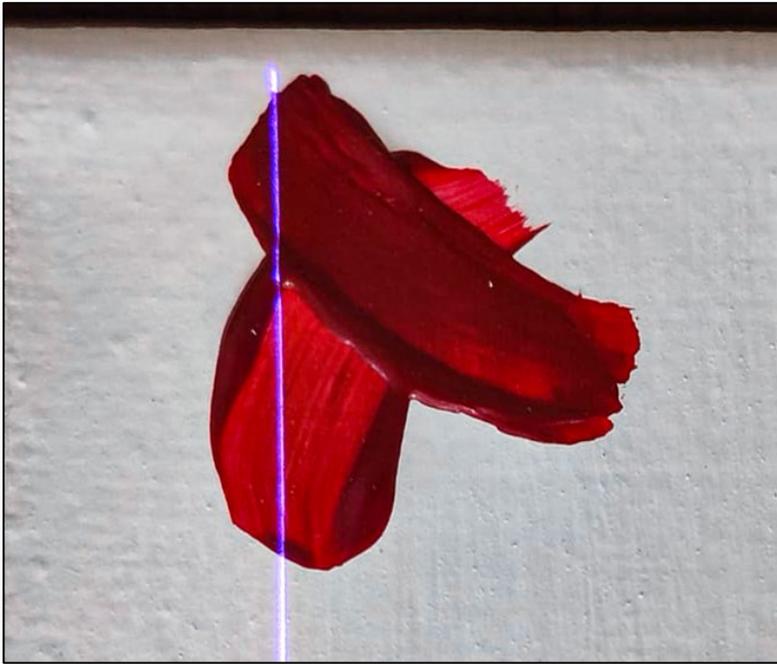

RHUM

**Resistive
High
granularity
Micromegas**

PERSEPOLY

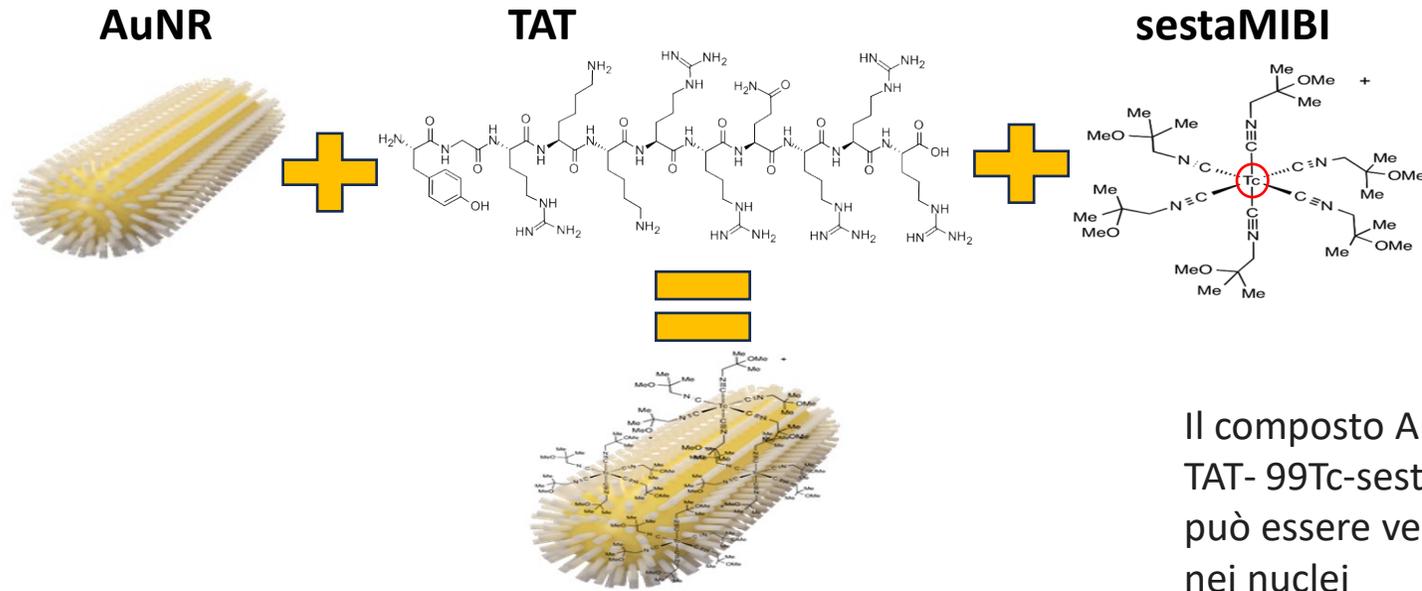

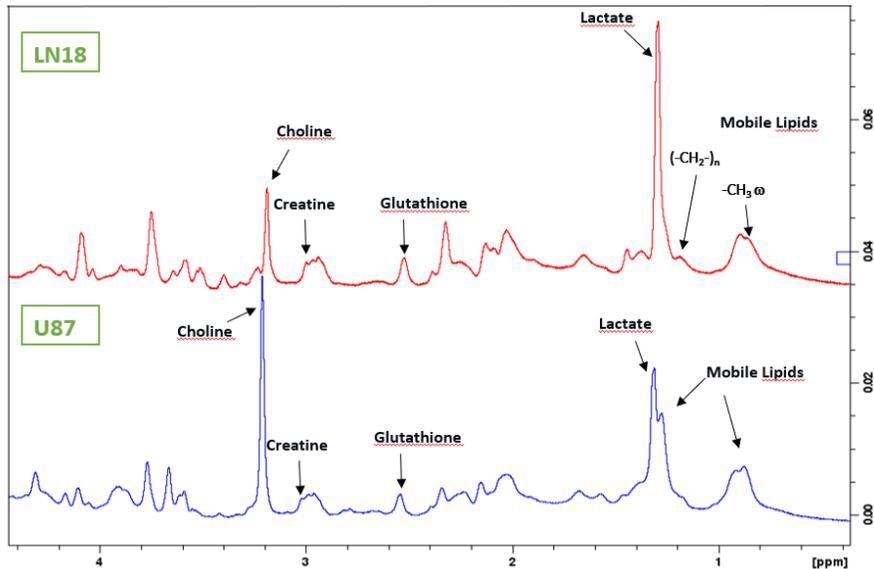

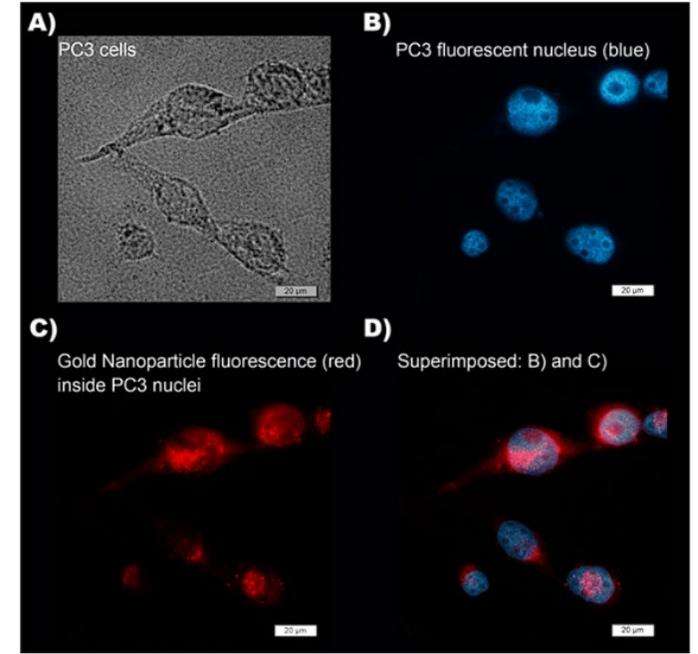

Persepoly:
gli artisti

SEGNAR Synergic Effects of Gold Nanorods And Radiopharmaceuticals

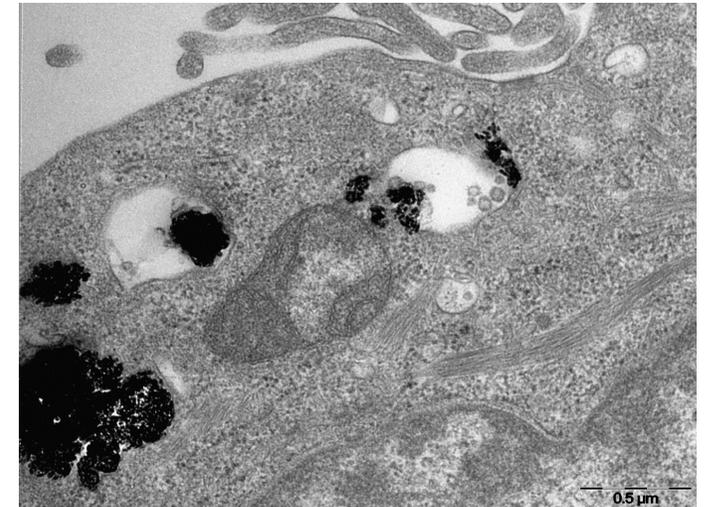

(il futuro)

Il composto AuNRs-TAT- 99Tc-sestaMIBI può essere veicolato nei nuclei

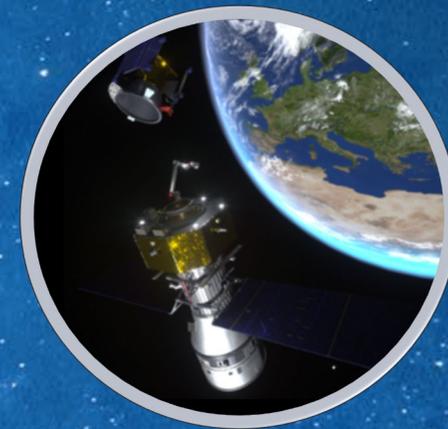

TEM micrographs of intestine cells treated with NR

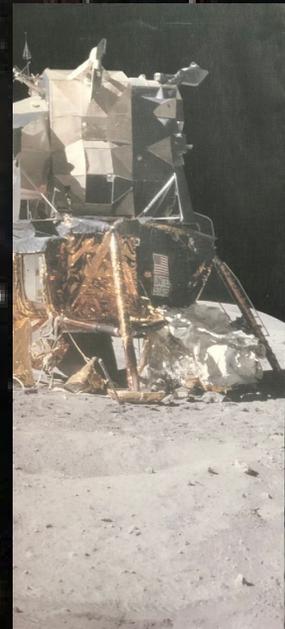

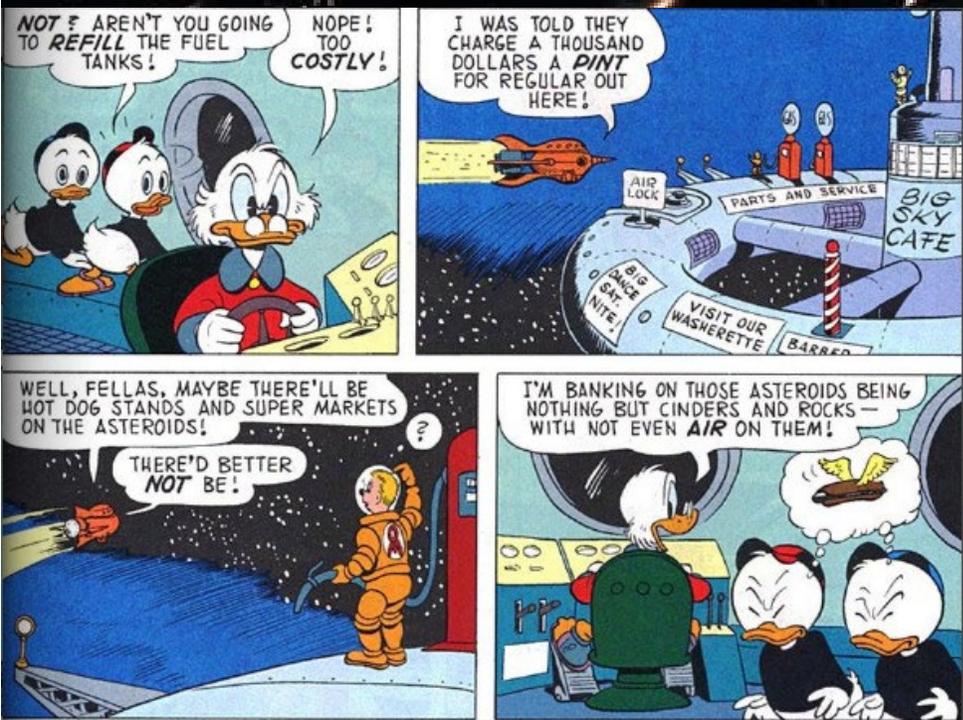

I ricercatori del Laboratorio analisi Superfici

PNRR – IN ORBIT SERVICING (IOS)

Finanziato
dall'Unione europea
NextGenerationEU

Un grazie va a tutte le persone che nel passato hanno contribuito in modo rilevante alla costruzione dei laboratori così come sono oggi a tutto lo staff tecnico ed amministrativo che negli anni ha sempre aiutato e sostenuto con convinzione il lavoro dei ricercatori e a quelli che prima di noi hanno portato avanti esperimenti che non ho fatto in tempo a menzionare.

Tra le questi è doveroso ricordare gli amici non più in servizio nella Sezione :

V. Cencelli

E. Spiriti

L. Tortora

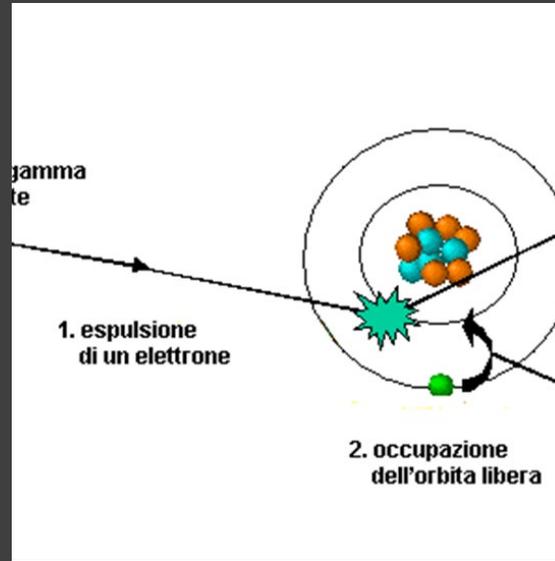

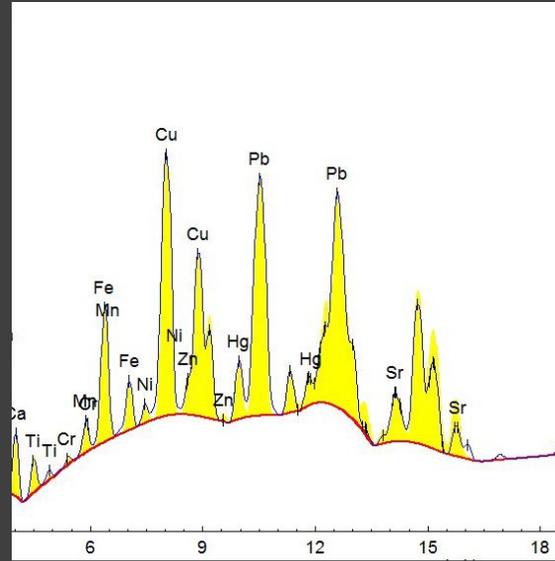

E naturalmente....

Al primo storico coordinatore di CSN5.

Ciao Prof!
