

XIX AVOGADRO MEETING on Strings, Supergravity and Gauge Theories

Wednesday, 20 December 2023

Gong Show (14:30 - 17:00)

time	[id] title	presenter
14:30	[18] Freund-Rubin compactifications of non-supersymmetric strings	RAUCCI, Salvatore
14:40	[19] Free energy on the sphere for non-abelian gauge theories	DE CESARE, Fabiana
14:50	[20] Geometry of Cosmological Correlators	DIAN, Gabriele
15:00	[21] Spinning partial waves for scattering amplitudes in any dimension	RUSSO, Francesco
15:10	[22] Remodeling Equivariant GLSMs	SCAZZUSO, Davide
15:20	[23] The gravitational nature of generalized TTbar deformations	MORONE, Tommaso
15:30	[24] AdS2 vacua from SL(2,R) T-Duality	Mr CONTI, Andrea
15:40	[44] Analytical bootstrap for the O(3) magnetic impurity	DE SABBATA, Elia
15:50	[26] Non-unitary multicriticality in two dimensions	MISCIOSCIA, Alessio
16:00	[45] Broken (super) conformal Ward identities at finite temperature	MARCHETTO, Enrico
16:10	[38] TBD	BASON, Davide
16:20	[49] Gravitational Axiverse Spectroscopy: Seeing the Forest for the Axions	PUTTI, Margherita
16:30	[50] Higher-point lightcone bootstrap in the comb channel	QUINTAVALLE, Lorenzo
16:40	[46] Remarks on BPS Wilson loops in non-conformal N=2 gauge theories and localization	TESTA, Alessandro
16:50	[57] Is action complexity better for dS space in JT gravity?	ZENONI, Nicolò
