# HADRON IAC meeting

September 27, 2023

Raffaella De Vita, Mikhail Osipenko,  
Elena Santopinto

# HADRON2023 in brief

- About 300 participants from Africa, America ( north and south), Asia, Australia and Europe
- HADRON2023 was listed as high-level conference by all the main experiments
- Hosted the Simon Eidelman Prize. The Conference organization provided partial support for the attendance of the winner (we hope this will continue in the next editions)
- Assigned awards for the best talk from young speakers, one for each parallel track (we hope also this will continue in the next editions)
- The Conference web page will remain on the server <https://agenda.infn.it/event/33110/>
- The Conference received many emails of compliments from participants for the scientific program, the organization, the location, the social activities, and the atmosphere.
- The Conference gave support, waving or reducing the fees for colleagues and/or young participants (we had about 20% student participation) who requested it

# Proceedings

- The peer-reviewed proceedings of HADRON2023 will be published in Il Nuovo Cimento C (<https://www.sif.it/riviste/sif/ncc>). It is indexed by Scopus.
- Paper submission is open through the conference website at <https://agenda.infn.it/event/33110> and will close on October 15 2023 at 23:59 CET.
- Extension up to the end of October only in exceptional cases.
- All the relevant instructions and materials are available at <https://agenda.infn.it/event/33110/page/7926-proceedings>.
- The contract with the journal includes editing of text and figures, so that the reviewer will only have to focus on the content of the proceedings
- Conveners will be invited to contribute in the peer-review process. Help from the IAC members would be very much appreciated

# Summary of the last IAC meeting (the 20th of June)

- It was observed by members of the IAC that HADRON usually rotates between Europe, Asia, and America, and for that reason, it seemed natural that the next edition could go, if possible, to Asia, so Japan, China, Korea, but also Australia. For the same reason, it was decided to consider possible proposal from other areas with lower priority

**HADRON  
2023**

This series of conferences started in 1985 in Maryland, USA

It brings together experimentalists and theorists, every other year, to review the status and progress in hadron spectroscopy, structure, and related topics and to exchange ideas for future explorations

**HADRON2023:**

- 296 participants
- 263 parallel session talks

HADRON2021, XIX, Mexico City, Mexico  
HADRON2019, XVIII, Guilin, China  
HADRON2017, XVII Salamanca, Spain  
HADRON2015, XVI Jlab, Newport News, VA, USA  
HADRON2013, XV, Nara, Japan  
HADRON2011, XIV, Munich, Germany  
HADRON2009, XIII, Florida State University, USA  
HADRON2007, XII Laboratori Nazionali di Frascati, Italy  
HADRON2005, XI Rio de Janeiro, Brazil  
HADRON2003, X Aschaffenburg, Germany  
HADRON 2001, IX, Protvino, Russian Federation  
HADRON 1999, VIII, Beijing, China.  
HADRON 1997, VII Upton, NY, United States  
HADRON 1995, VI Manchester, United Kingdom.  
HADRON 1993, V, Como, Italy  
HADRON 1991, IV, College Park, MD, USA  
HADRON 1989, III, Ajaccio, Corsica, France  
HADRON 1987, II, Tsukuba, Japan,  
HADRON 1985, I, College Park, MD, USA

- It was suggested that proposals for the next editions should be formalized with a presentation at a new IAC meeting in September
- In conclusion, it was decided to postpone any decision to today's meeting where the presentation of the proposals will be followed by the discussion among the IAC
