

Nuclear Astrophysics at CASPAR

Friday, 23 February 2024 10:30 (30 minutes)

This talk will provide a short overview of the development of the CASPAR laboratory and its scientific program over the last decade. Because of the installation of the DUNE detector, CASPAR is presently not accessible. The talk will report on the present status of CASPAR and the scientific priorities after the laboratory reopens in summer 2024.
