Francesca Bozzano

GEOLOGA, GEOLOGA APPLICATA

mi occupo di rischi geologici e dei progettazione geologica di opere e interventi sul territorio.

Il mio insegnamento principale nella LM GAITR: geologia applicata alle costruzioni

opero nel Dipartimento di Scienze della Terra e del centro di ricerca interdipartimentale CERI «Previsione, Prevenzione e Controllo dei Rischi Geologici

nel 2009 socio-co-fondatore dell'azienda di spin-off Sapienza Nhazca, dal 2021 start up Sapienza

2000 – 2010: la diffusione del monitoraggio
satellitare e delle tecnologie in remoto

LA NOSTRA CILIEGINA SULLA TORTA

Galleria San Giovanni, sulla autostrada SA-RC: quando noi decidiamo di applicare la tecnologia radar terrestre alla gestione in corso d'opera di una galleria all'interno di un versante di frana

NHAZCA

NATURAL HAZARDS CONTROL AND ASSESSMENT

2024

2009

VISION

Pioneering the geohazard analysis, monitoring and management market segment by making complex data actionable for resilient and sustainable natural and built environments

MISSION

Provide efficient, reliable, innovative and high-quality consultancy and services for the analysis and monitoring of natural hazards and structural health monitoring to support the design and management of large-scale projects.

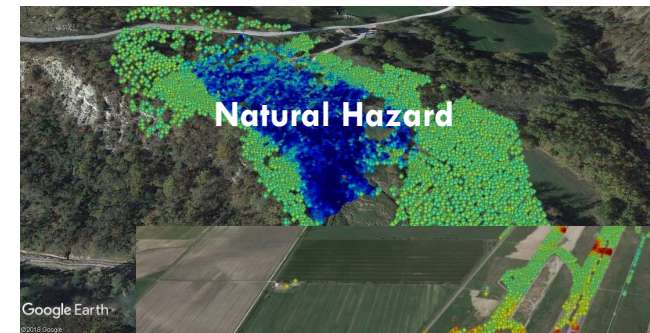

OUR MOTTO: *Translating data into actionable information!*

<https://www.nhazca.it>

APPLICATIONS - MAIN SECTORS

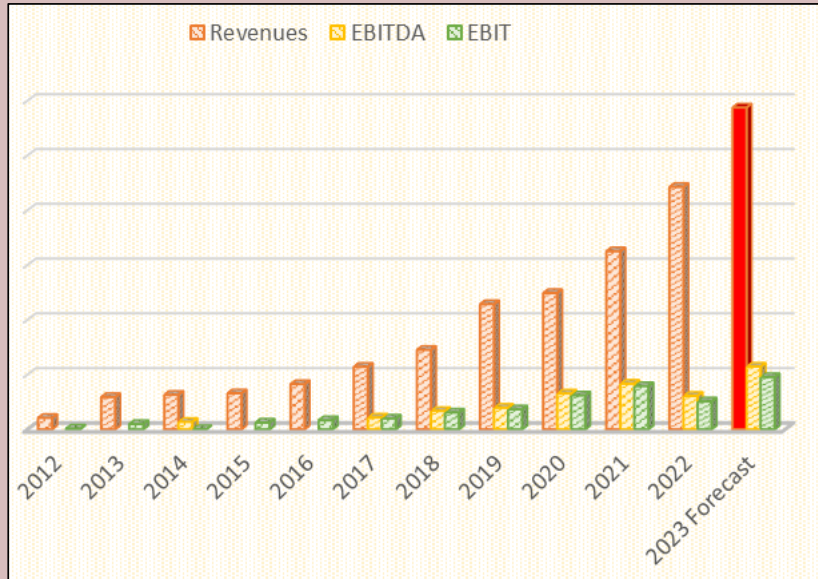

- 1: Civil protection**
Natural Hazards assessment and risk mitigation
- 2: Highway/railway industry**
- 3: Hydropower & Energy sector**
- 4: Oil & Gas**
- 5: Mining**
- 6: Cultural Heritage**

OUR CLIENTS

MAIN NATIONAL CLIENTS

MAIN INTERNATIONAL CLIENTS

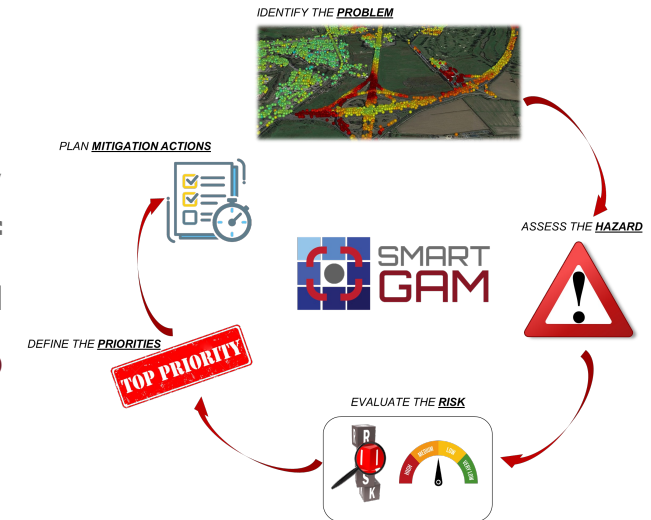

ASSETS – RECENT TECHNOLOGIES

SMART GEOTECHNICAL ASSET MANAGEMENT, innovative, **STANDARD** and **REPEATABLE** approach for the analysis of **GEOTECHNICAL ASSETS** aimed at **PREDICTIVE MAINTENANCE** and **RISK REDUCTION**, based on **SATELLITE DATA** and **GROUND SEGMENT** information.

PERIODIC PHOTOMONITORING BY SMARTPHONE
PHOTOMONITORING for **PERIODIC CHANGE DETECTION** analyses on structures or natural elements (e.g. slopes, landslides) by **QUICK SURVEYS** with **LOW-COST SENSORS** (e.g. smartphones, DLSR etc.).
The goal of the technology is to **ENRICH DATA** by leveraging the large quantity of sensors available all over.

ASSETS – OUR BRANDS

PRIMO is PRompt Intervention Monitoring, the service offered by **NHAZCA** for the deployment of emergency monitoring solutions in less than 48 hours, in case of landslide or failure events.

PhotoMonitoring is an innovative and unique monitoring approach, based on change detection and displacement analysis of a set of images, acquired from ground cameras, drones, satellites.

ASSETS – PATENTS*

CARE – Camera Registration and Alignment is the innovative system designed and developed by **NHAZCA**, allowing for **PHOTOMONITORING PERIODIC SURVEYS**. **CARE** allows the **PRECISE RE-POSITIONING** of the photographic sensor, thus minimizing processing errors and providing unprecedented **RELIABLE RESULTS**.

ROCKFALL DETECTOR is a methodological **PHOTOMONITORING** approach for the automatic identification, classification, mapping and inventory of **ROCKFALLS**, based on the analysis of **GIGAPIXEL IMAGES** continuously collected on hazardous scenarios (sea cliffs, rock slopes), allowing to capture from very small to large magnitudes events.

10TH  **ICGSM**
INTERNATIONAL COURSE
ON **G**EOTECHNICAL
AND **S**TRUCTURAL **M**ONITORING

11-14 JUNE 2024 | **GOLDEN (CO)**
UNITED STATES

In 2024 the International Course on Geotechnical and Structural Monitoring (ICGSM) will celebrate the 10th Anniversary Edition with a special event in the country where the idea of ICGSM was discussed for the first time by John Dunnycliff and Prof. Paolo Mazzanti.

Since 2014, ICGSM is recognized as “not-to-miss event” representing a unique network and training opportunity for the professional, academic and industrial world of geotechnical and structural monitoring with the participation of leading international experts and exhibitors in a large EXPO area.

Don't miss the chance to be part of this Anniversary Edition!

VISION

At IntelligEarth, we envision a future where our innovative tech solutions redefine global efforts in preserving and protecting our planet. By weaving together, the threads of crowdsourcing, AI, and immersive technologies, we are dedicated to forging a resilient and sustainable world. Join us in shaping an intelligent, greener, and interconnected future.

MISSION

We are developing cutting-edge, user-friendly technologies, drawing inspiration from space applications, for the timely monitoring of cultural and environmental heritage by taking advantage of crowdsourcing and artificial intelligence to make monitoring of cultural and natural heritages accessible, systematic, cost-effective, and socially engaging.
