INDIGO IAM

status + roadmap

IAM v1.8.3 released

- currently deployed in production for LHCb, ATLAS, Alice and CMS
  - also installed for dteam VO
- no big issues observed (finger crossed)
  - https://github.com/indigo-iam/iam/pull/683 Only registered users can get client credentials grant type #683

IAM v1.8.4

We'll provide soon a RC with:

- https://github.com/indigo-iam/iam/pull/683 Only registered users can get client credentials grant type #683
- https://github.com/indigo-iam/iam/issues/684 Unable to delete client when one of its related tokens has null AuthenticationHolder related

This could be a potential release.

Towards Data Challenge

- Profiling with Java Flight Recorder
  - performance enhancements are the target

IAM v1.8.x or v1.9.0

- Migration to Spring Authorization Server
  - tests started
- Development of a new IAM Dashboard
  - development started
- OPA support vs Scope policy API
  - in evaluation
