1st TEONGRAV international workshop on the
Theory of Gravitational Waves

A tribute to Stefania Marassi

a joyful journey in between exploding stars,
compact objects and gravitational waves

Valeria Ferrari and Raffaella Schneider

Sapienza Università di Roma

ROME February 2019

Stefania Master thesis

Università degli Studi di Roma “La Sapienza”

Facoltà di Scienze Matematiche Fisiche e Naturali

Corso di laurea in Fisica

Anno Accademico 2002-2003

Tesi di Laurea

Equazioni di struttura stellare per stelle di neutroni rotanti

Candidata

Stefania Marassi

Numero di matricola: 11083078

Relatore

Prof.ssa Valeria Ferrari

Title: The equations of stellar structure for rotating neutron star

She took as a reference the fastest spinning pulsar observed at that time, PSR 1937 21 rotating at 641 Hz

She showed that the perturbative approach at third order in the rotation rate describes all stellar properties to an accuracy better than 2 % even for the maximum mass models

The fasted spinning pulsar observed until today is PSR J1748-2446ad which rotates at 716 Hz

Stefania PhD thesis

Università degli Studi di Roma “ La Sapienza”

Dottorato di Ricerca in Astronomia - XX Ciclo

STRUCTURE AND OSCILLATIONS OF NEUTRON STARS

Thesis submitted for the degree of

Doctor Philosophiae

PhD in Astronomy - XX cycle- October 2007

Coordinator

Prof. Paolo de Bernardis

Advisor

Prof.ssa Valeria Ferrari

Candidate

Dr. Stefania Marassi

Anno Accademico 2006-2007

YEARS 2003-2007

O. Benhar, V. Ferrari, L. Gualtieri and S. Marassi, “Perturbative approach to the structure of rapidly rotating neutron stars”, *Phys. Rev. D* 72, 044028, 2005

V. Ferrari, L. Gualtieri, S. Marassi “A new approach to the study of quasi-normal modes of rotating stars”, *Phys. Rev. D* Vol.76, No.10, 104033, 2007

O. Benhar, V. Ferrari, L. Gualtieri, S. Marassi “Quark matter imprint on Gravitational Waves from oscillating stars”, *Gen. Rel and Grav.* 39, n. 9, 1323-1330, 2007.

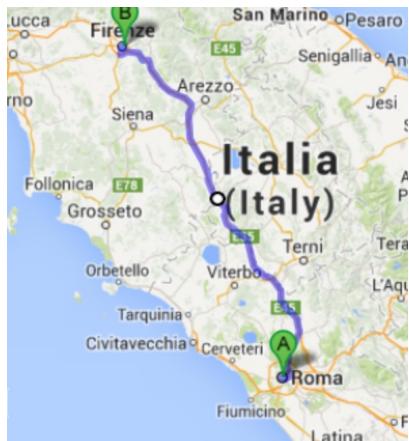

From 2005 to 2013 Valeria chaired the Virgo-EGO Scientific forum (VESF), funded by EGO (the European Gravitational Observatory).

EGO awarded 22 fellowships

Fellow	1) Sources potentially detectable by Virgo	2) Waveforms from astroph. sources	3) Coincidences with other astrophys. instruments	4) Data analysis methodologies	5) Virgo data taking and data analysis	6) R&D for future upgrade of Virgo

this was Stefania

She was a brilliant and talented scientist

She was a wonderful human being,
a generous and supportive friend,
and a very joyful person.

We miss her
and we are very grateful to have had the
immense fortune of sharing these wonderful
years of research with her

Award in the name of Stefania Marassi

<https://gofund.me/7a97c2f2>

we would like to remember Stefania's great passion for science and her desire to help and support others in achieving their goals. We have decided to launch a fundraising campaign to finance an award in her name, intended for young women scholars in the field of astrophysics and gravity theory. The amount of the award, which will depend on the funds raised, will be transferred to the Department of Physics at the University of Rome La Sapienza
