

TOF QC Coordination meeting 25/01/2024

General news

Calibration

Organize the work in order to trace systematically the status of TOF calibrations in parallel with the (A)QC

- Sync: QC to monitor the output of sync calibration during data taking
- Async: procedure to extract calibration as soon as the first reco pass (cpass) is available --> we expect to have O(2 weeks) between cpass0 and apass1 during pp Data Taking

Spreadsheet with status of asynch calibration:

<https://docs.google.com/spreadsheets/d/1DS6oyScBMJdtKqZpeD8x64LZoKZBpkgCH8Sps91NRlo>,

Put config matching window

Shall we put a axis for 3/10cm cut for the matching window? tbd

QC sincrono

- Moving window in place
- Trending Rate debugged
- to do list being done WIP

QC asincrono

- End of 2023 all in place
- Missing some Jira+RCT

TOF PID (AO2D)

PR for TOF PID in O2Physics --> matching window at 3 cm for PbPb

Documentation
