Indirect Searches for Dark Matter

Thursday, 11 July 2024 09:30 (30 minutes)

I will review the status of indirect searches for dark matter, including those using cosmic ray antimatter, gamma rays, and photons at other wavelengths. I will also summarize several of the anomalies and excesses that have been reported in the literature, and discuss ways in which the origins of these would-be signals for dark matter could be clarified.

Presenter: HOOPER, Dan (Fermilab/University of Chicago)

Session Classification: Plenary
