

PandaX-4T Experiment and its Recent Progress on WIMP search

Monday, 8 July 2024 14:00 (20 minutes)

PandaX-4T is a several-tonne-scale dark matter direct searching experiment, utilizing 4 tonne liquid xenon as target material in sensitive volume. The experiment is located at China Jinping Underground Laboratory, with overburden of 2400 meter water equivalent. In 2021, the PandaX-4T experiment has released its first data and obtained various search result at the time. In this talk, I will introduce the recent results of PandaX-4T experiment on the WIMP search with newly obtained data.
