# Tofprad @ CNAO2024

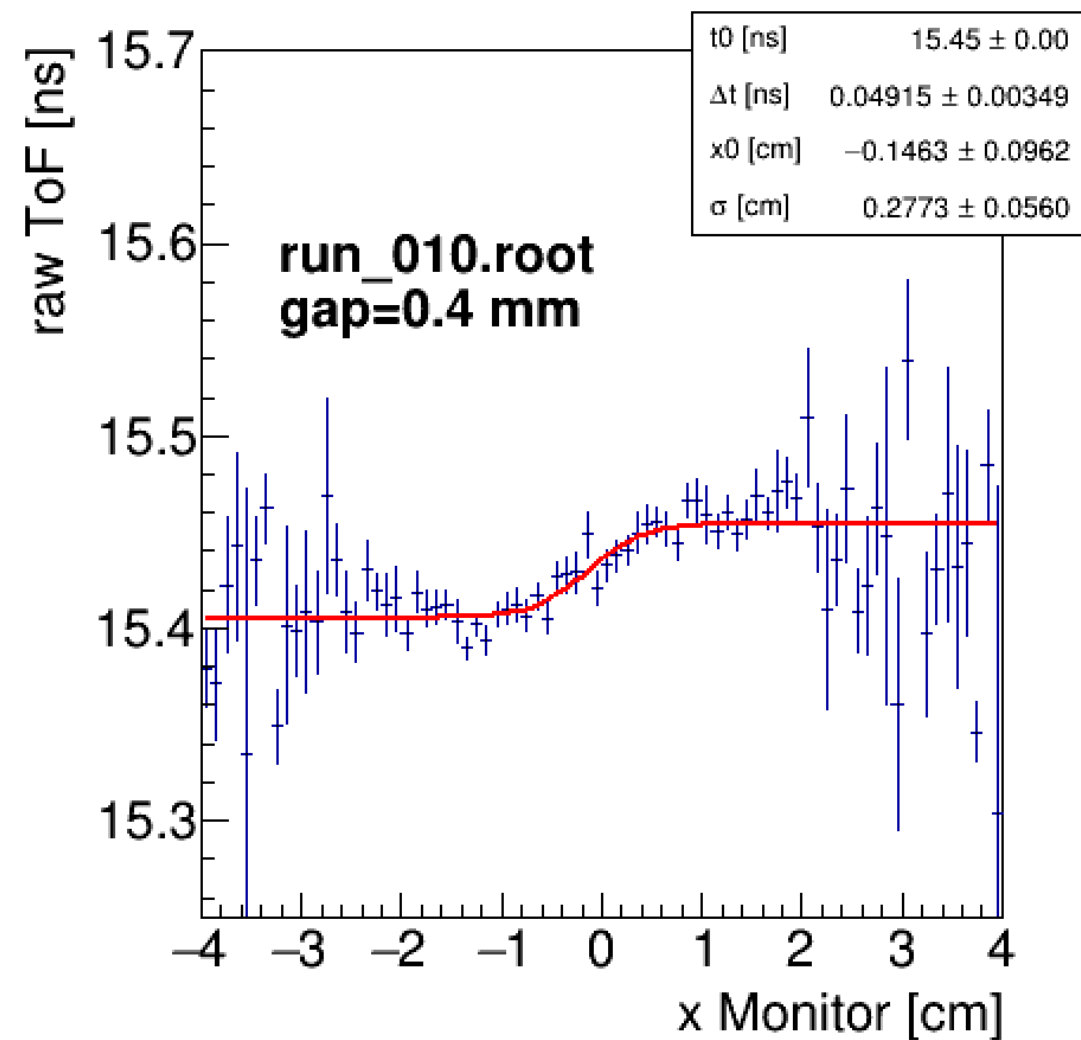

# Setup

# Edge function vs gap thickness

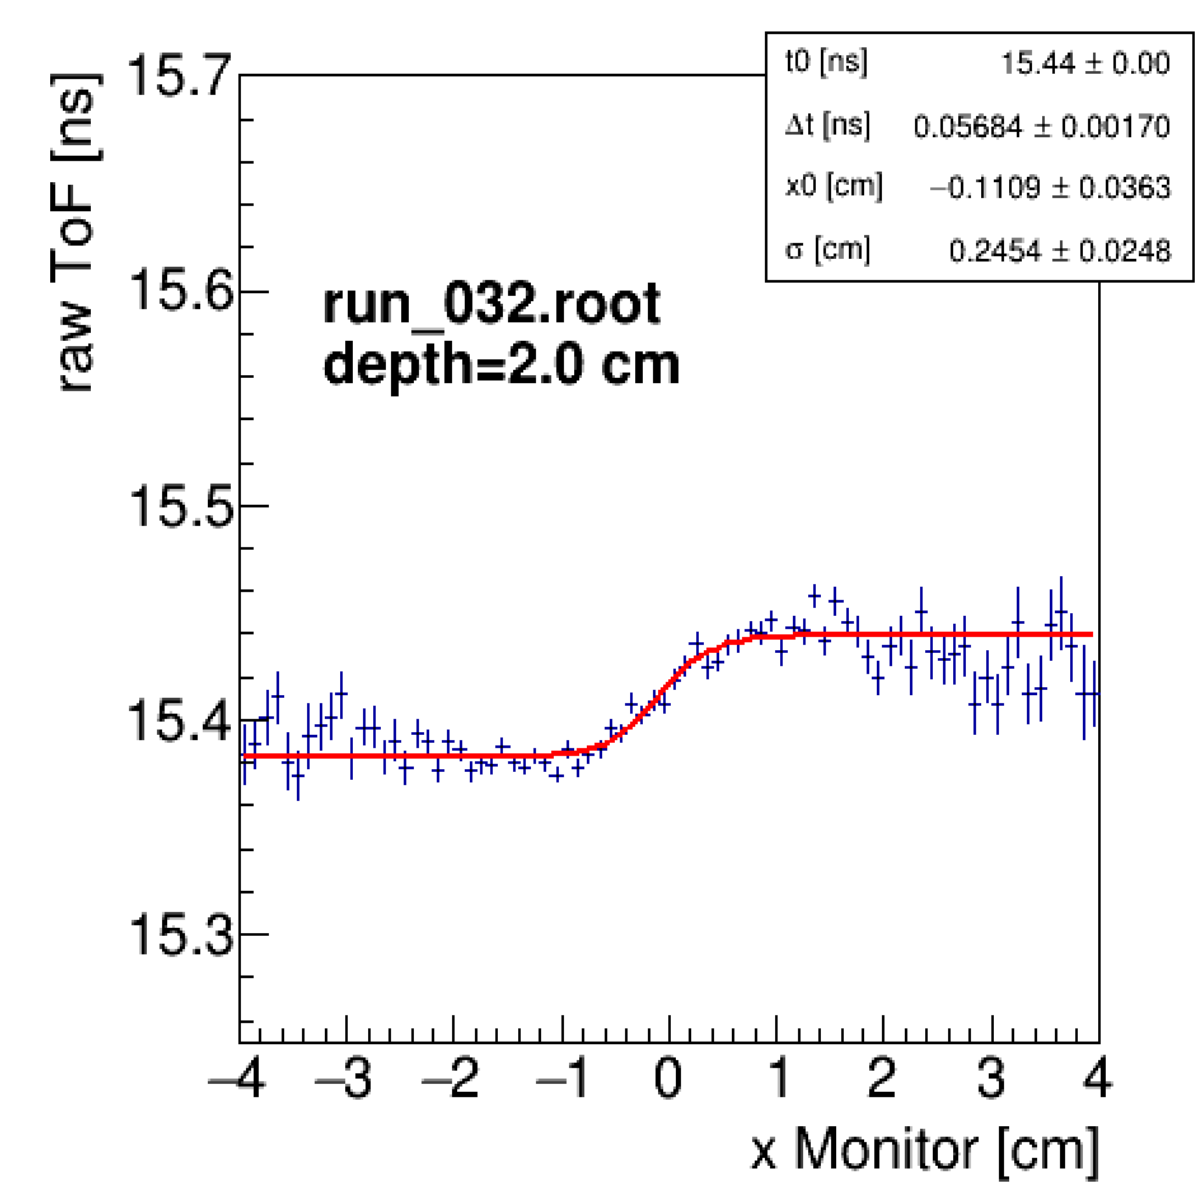

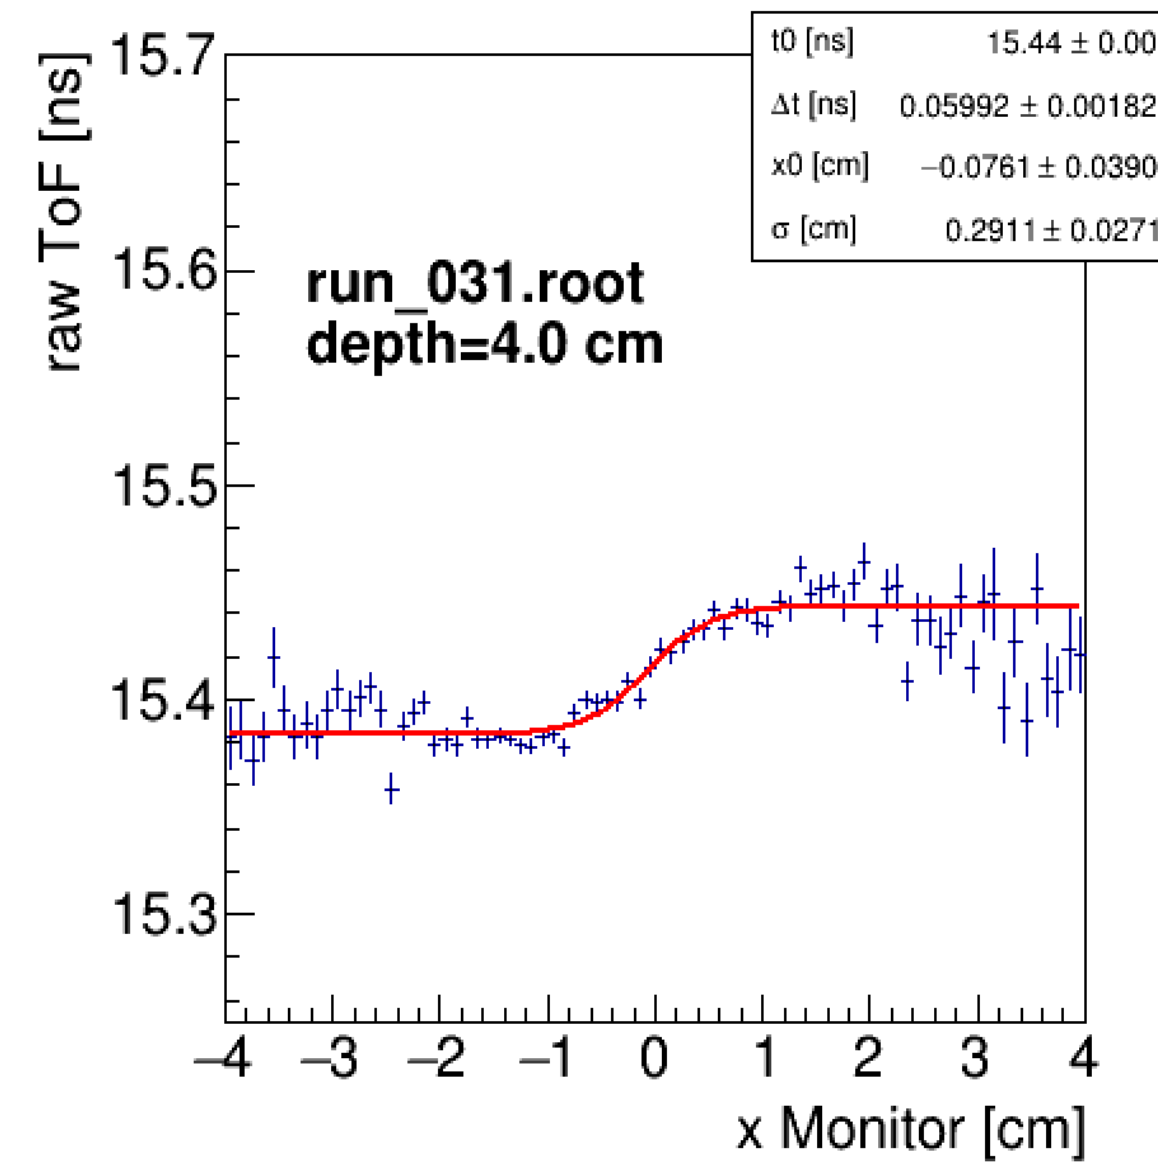

STCharge > 0.05  
TWCharge > 0.05

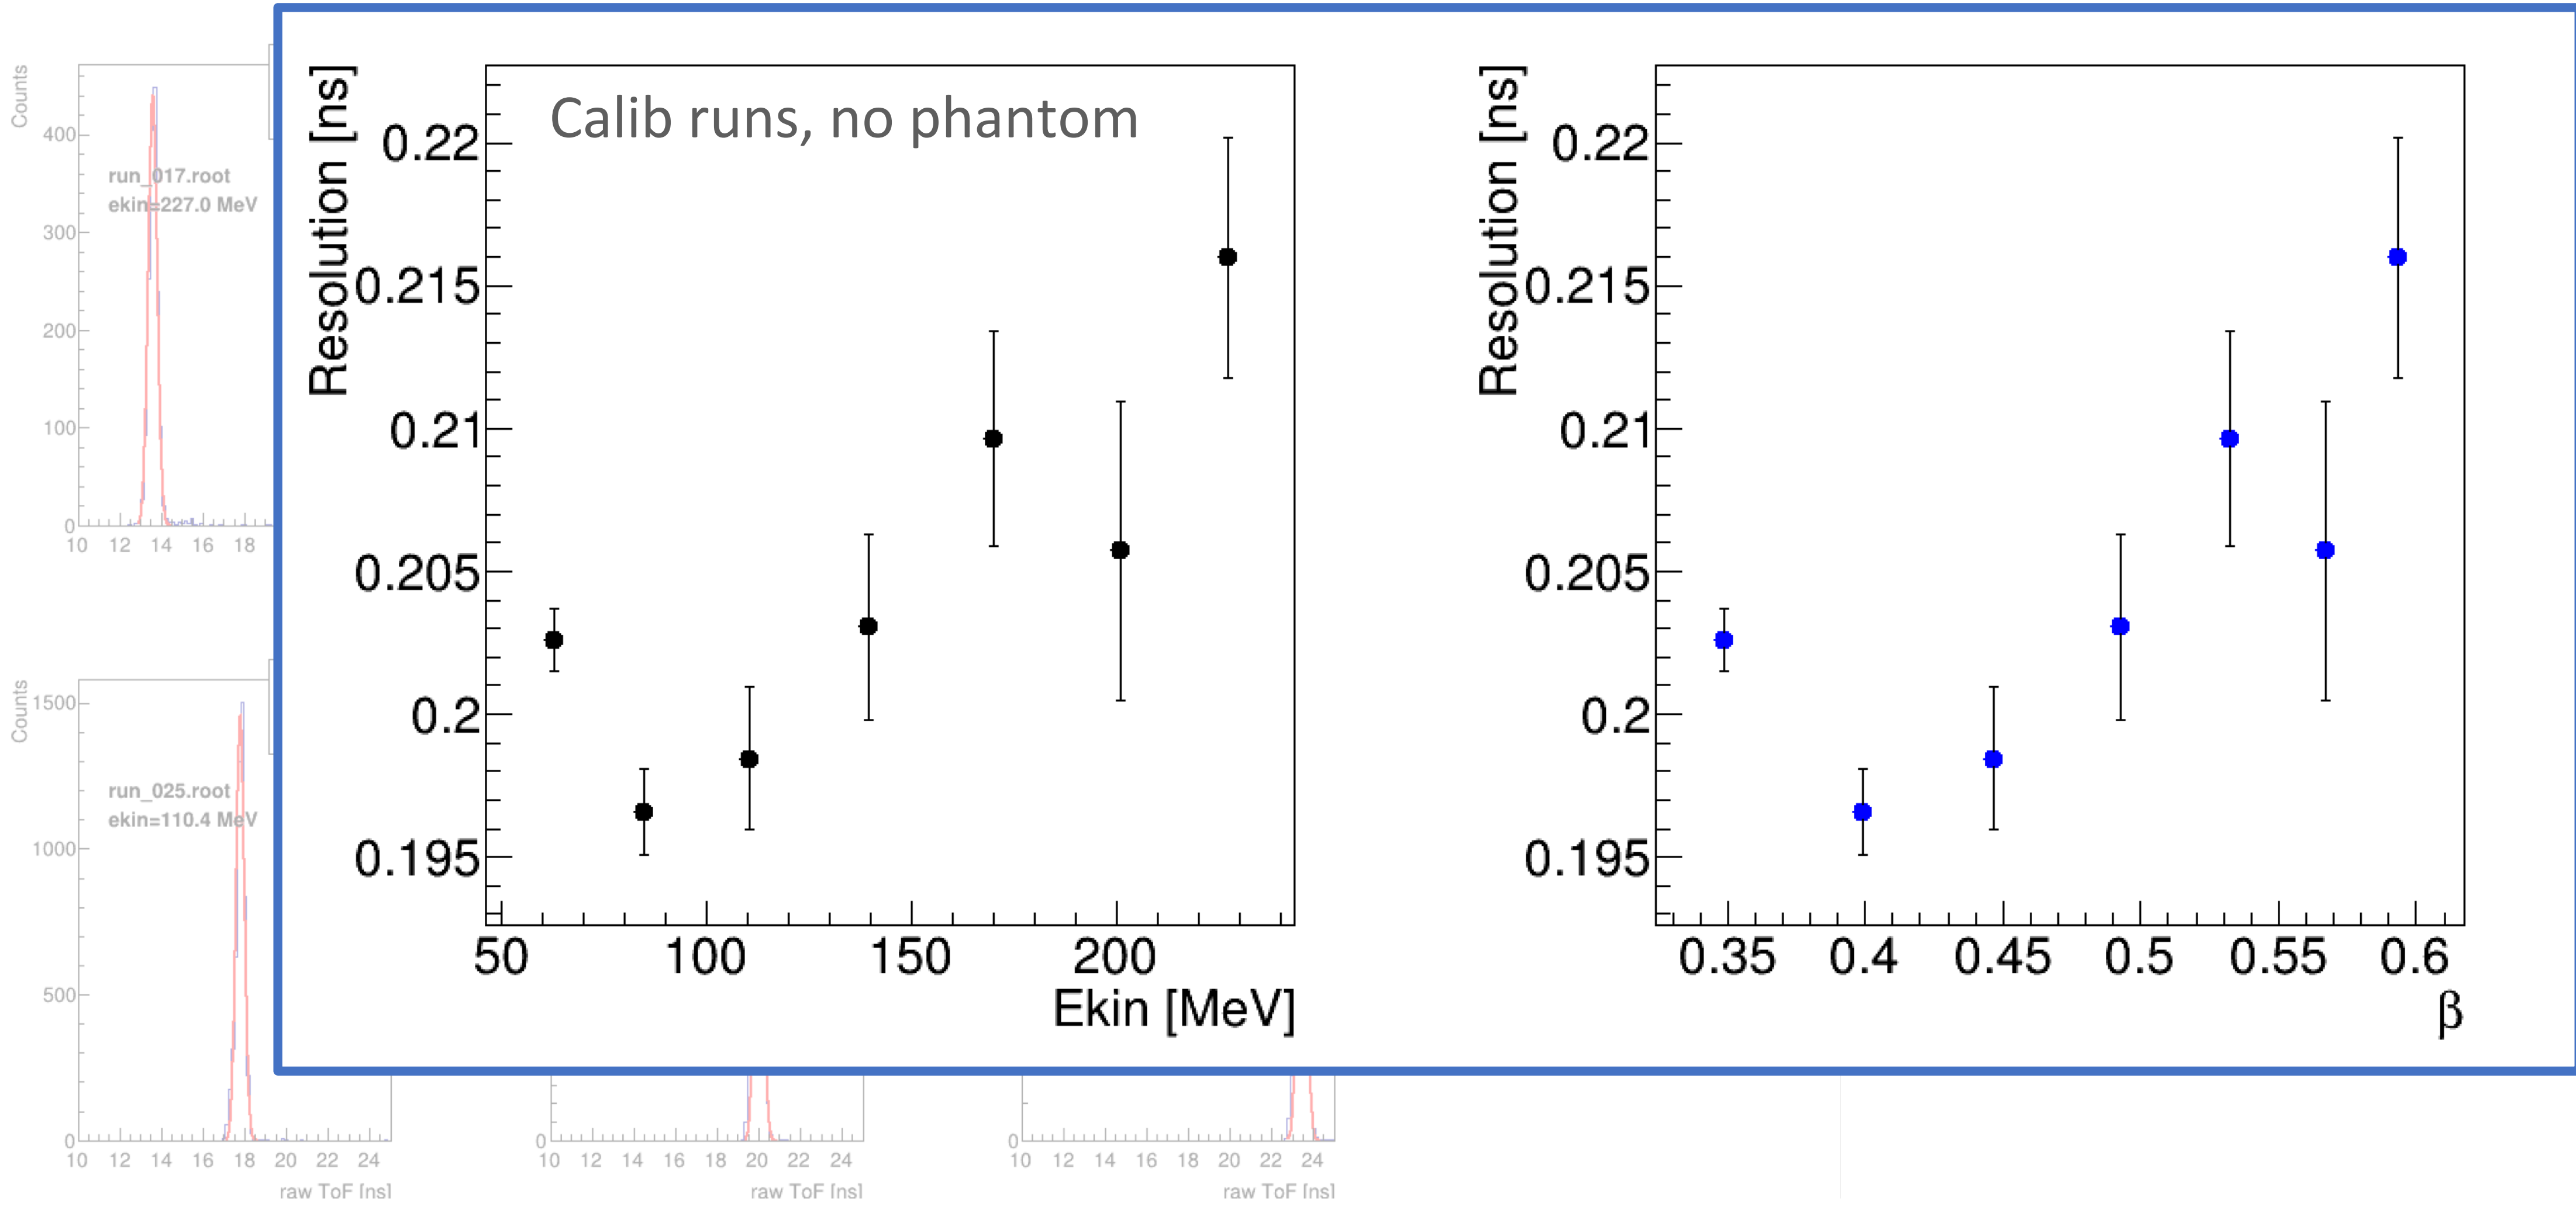

$$f(x) = t_0 - \Delta t \left( 1 - \frac{1}{1 + e^{-\frac{x-x_0}{\sigma}}} \right)$$

# Edge function vs gap depth

- Not clear behaviour... still some troubles in position reconstruction?

# Time resolution

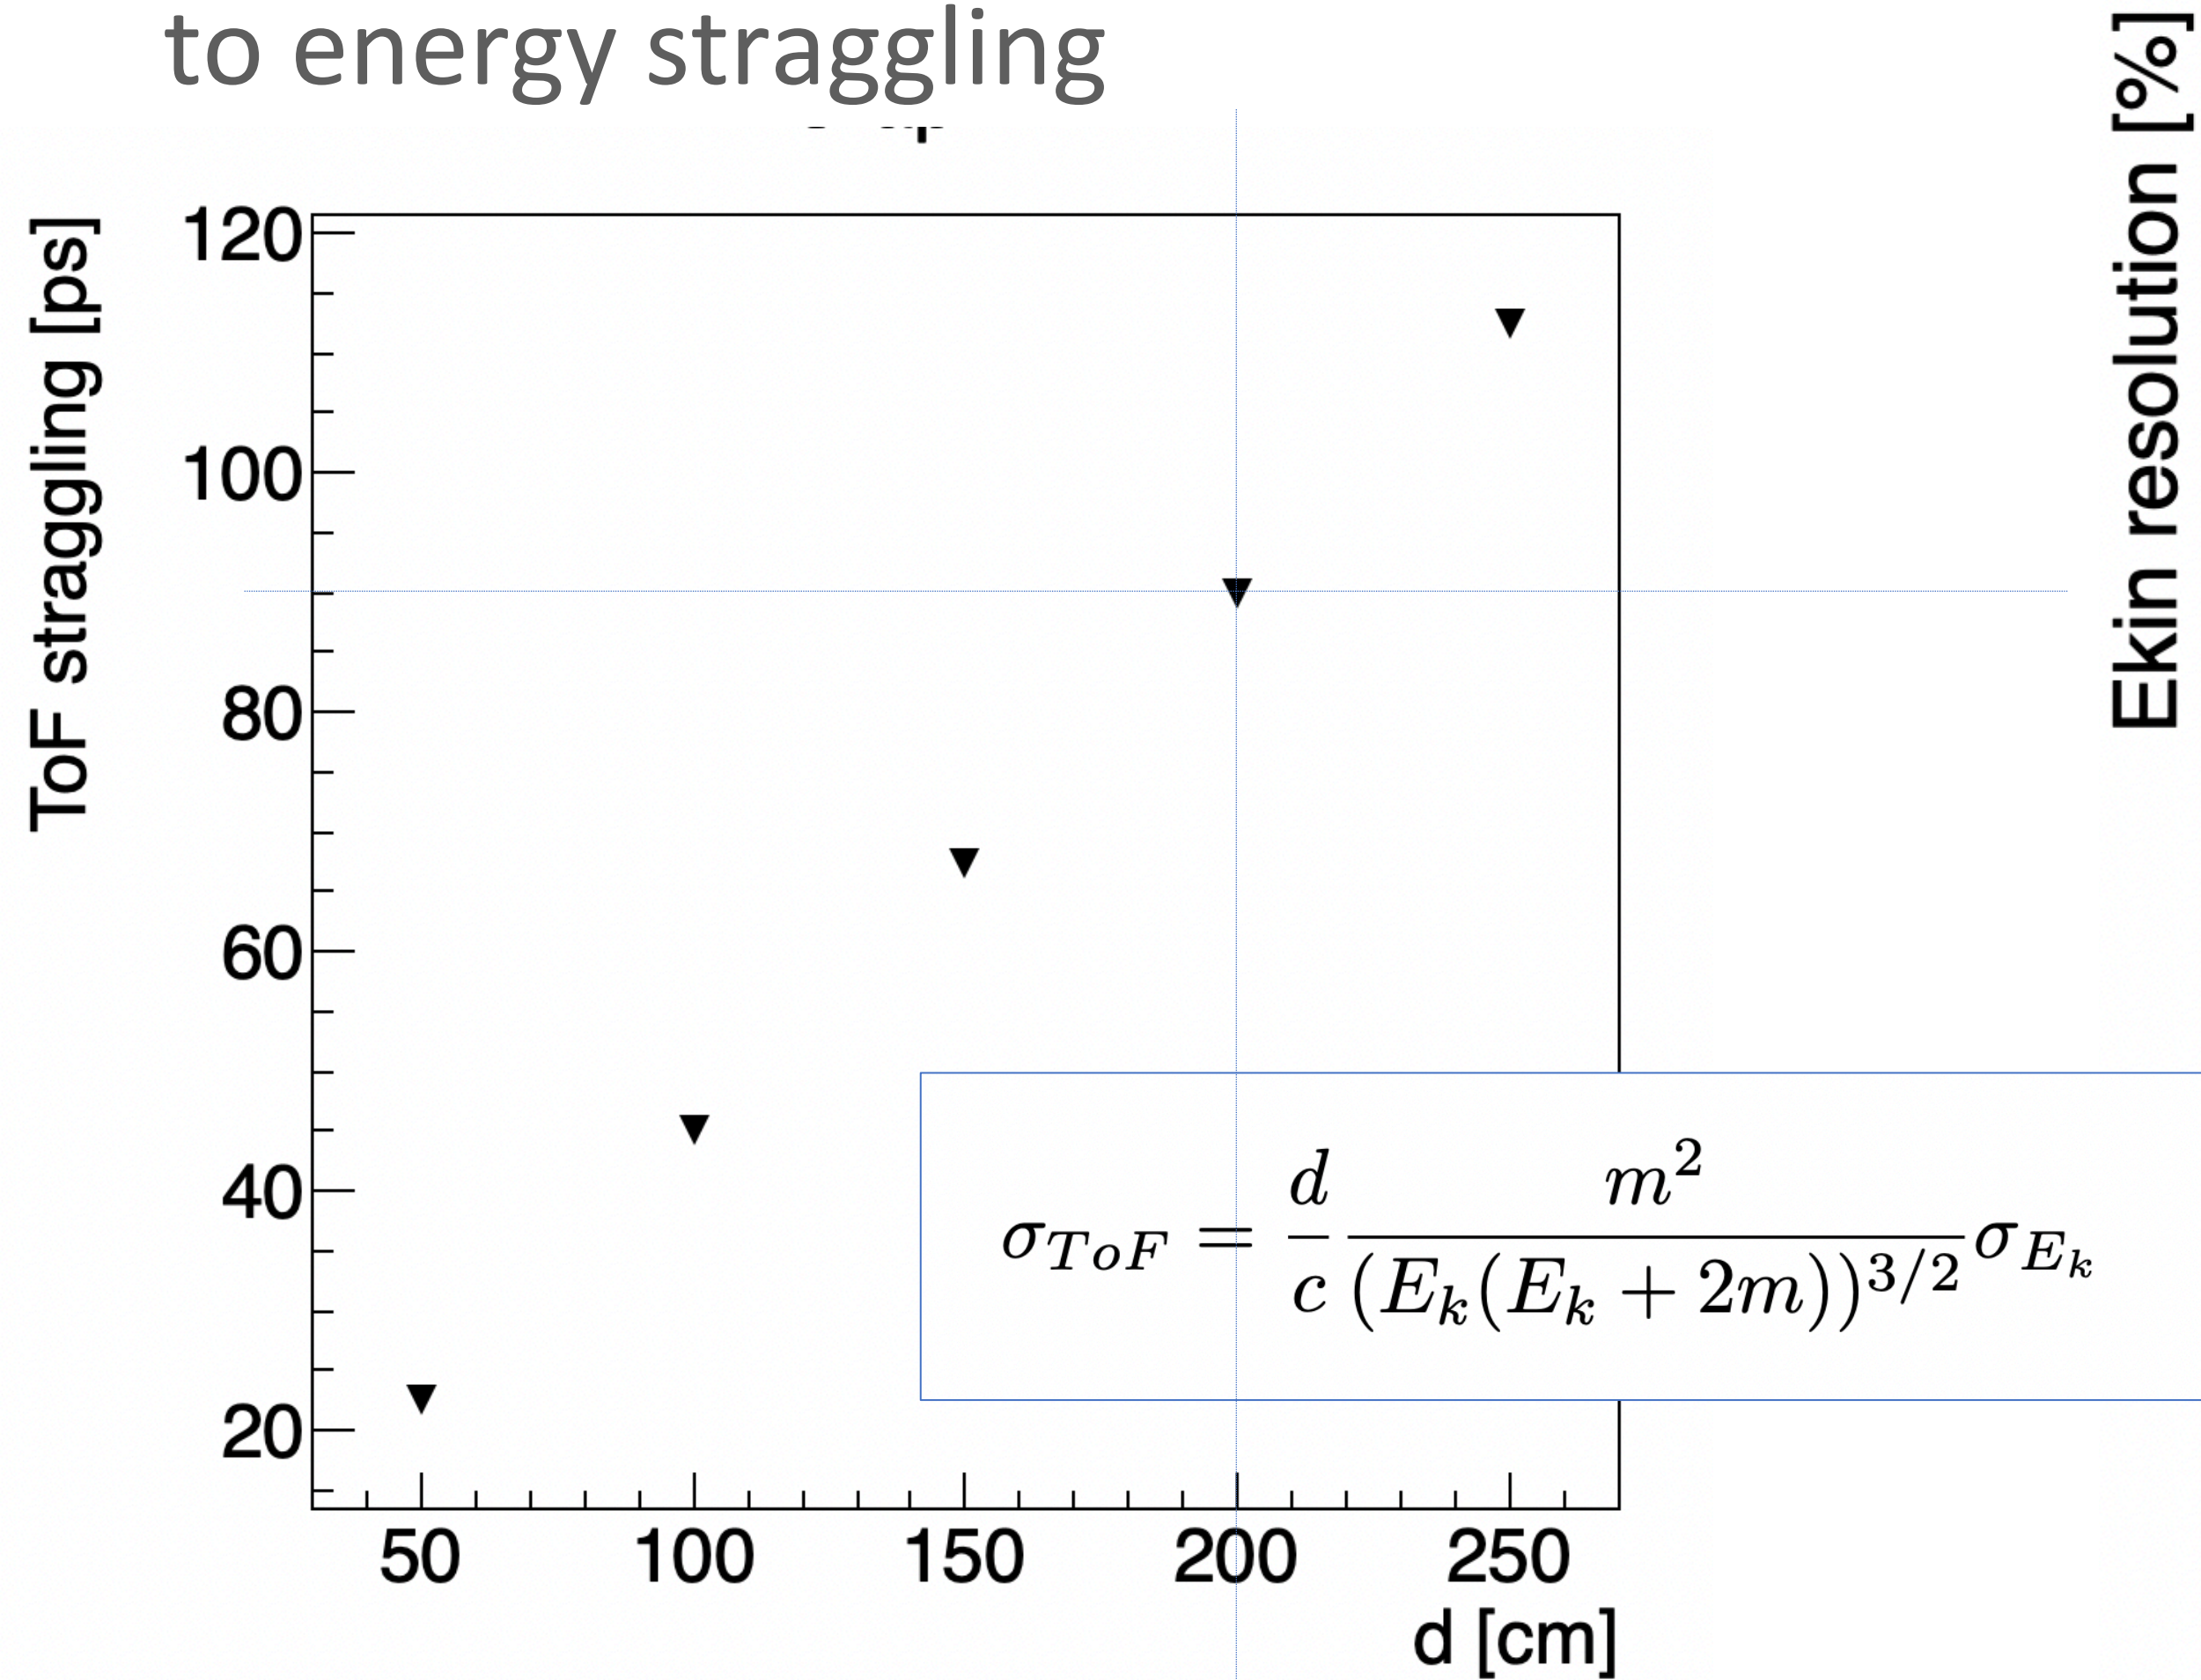

# ToF calibration

# Resolution and distance

ToF intrinsic contribution due to energy straggling

$$\sigma_{E_k} = m \frac{\frac{d^2}{c^2 t^2}}{\left(1 - \frac{d^2}{c^2 t^2}\right)^{3/2}} \frac{\sigma_t}{t}$$

# 2D
