Kick-off Data Management activities

We need to start actively discussing the Data Management activity

This is what we discussed at the annual meeting at the end of 2023

We have to start from here to... see next slides

Kick-off Data Management activities

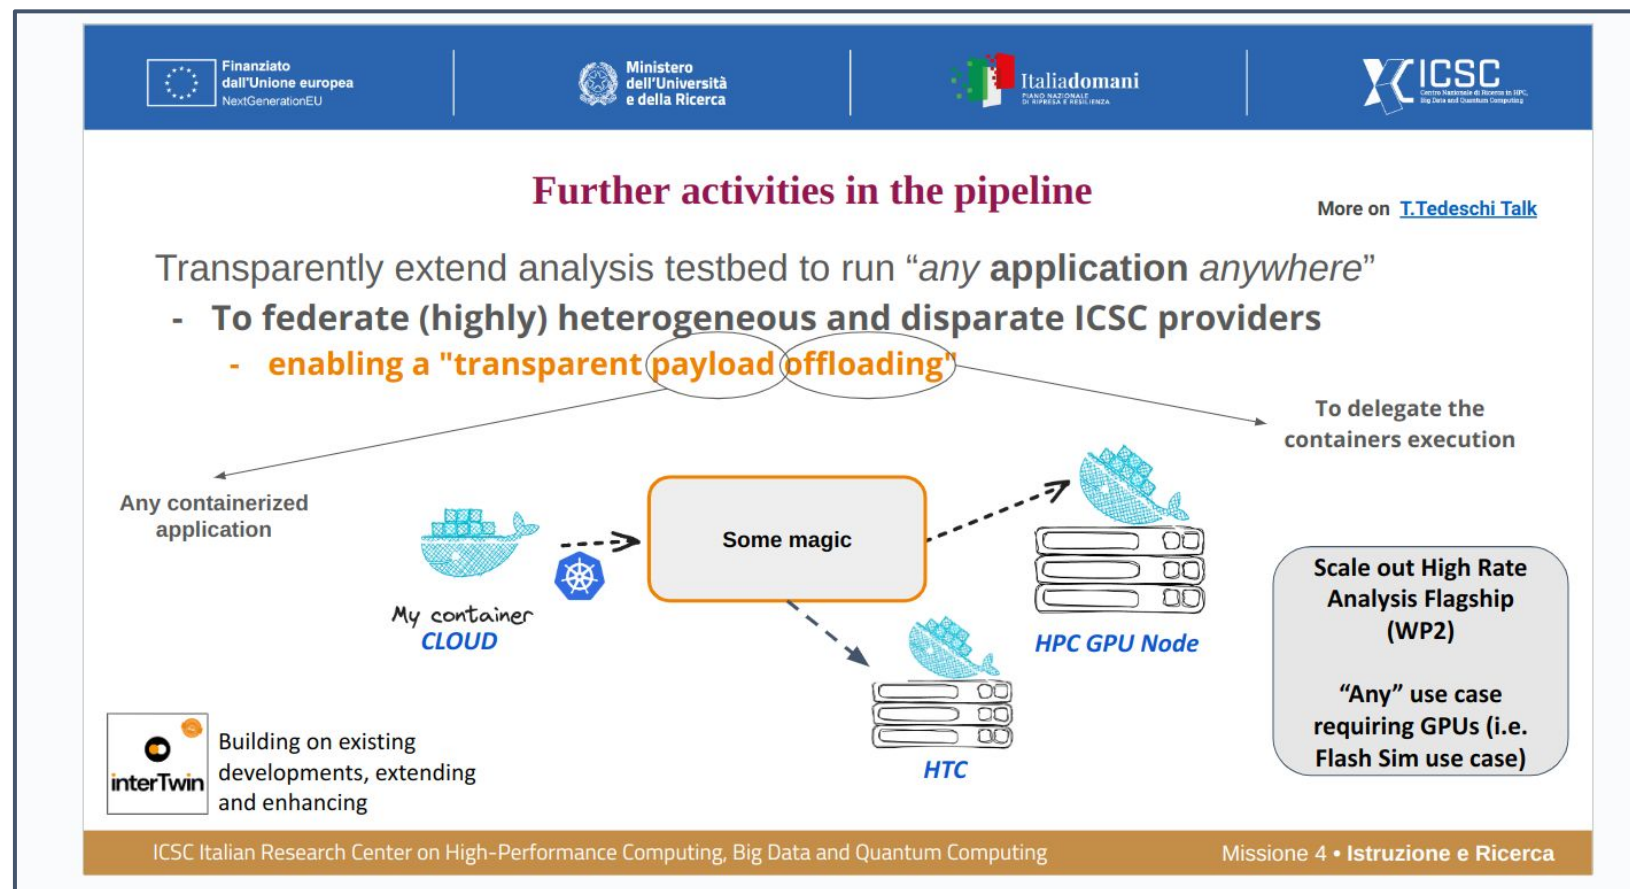

- Organize webinars/focused meetings with experts
On the INFN side we can easily identify people. Other proposals?
- Identify people interested from WP1-2-3 (and 5)
How do we go on? We need to define an inclusive way... mail to WP leaders?
- Deploy a demo testbed (few resources... hello world)
We should identify a similar situation to what we did for the analysis

What comes next? (spoiling)

This is what we discussed at the annual meeting

there are some timid requests from wp2(?), we could easily make a first extension of the analysis setup to enable this mechanism

NOTE: It's also a point to discuss with WP4.....
