Hackathon projects: pick your favorite!

Dear participants, the hackathon challenge is approaching.

We have 6 open problems, documented [here](). They cover different fields (from HEP to biology). The contact persons are all present at the school: feel free to stop them and ask questions!

You should then sign up for your hackathon project on this [spreadsheet]() before the start of the session. We wish to have al least 2 competing teams for each problem, each made of 3/4 students.
