

Hard Probes 2012

Thursday, 31 May 2012

Parallel IVC: Initial state and pA - parallel room T1C (14:00 - 16:00)

time	[id] title	presenter
14:00	[28] Initial state and thermalization in the glasma	GELIS, Francois
14:20	[22] Di-hadron angular correlation as a probe of saturation dynamics	JALILIAN-MARIAN, Jamal
14:40	[72] Parton Energy Loss and Modified Beam Quark Distribution Functions in Drell-Yan Process in p+A Collisions	WANG, Xin-Nian
15:00	[139] Linear vs non-linear QCD evolution: from HERA data to LHC phenomenology	QUIROGA-ARIAS, Paloma
15:20	[43] Hadron and prompt photon production in pA collisions at the LHC from the Color Glass Condensate	REZAEIAN, Amir
15:40	[42] Small-x physics at the Large Hadron-electron Collider at CERN	COLE, Brian
