

Hard Probes 2012

Monday, 28 May 2012

Parallel IA: Quarkonia - parallel room T3 (14:00 - 16:00)

time	[id] title	presenter
14:00	[140] Measurement of charmonium production in PbPb collisions at 2.76TeV with CMS	DONG HO, Moon
14:20	[103] Nuclear modification of J/ψ production in Pb--Pb collisions at $\sqrt{s_{NN}}=2.76$,TeV	WIECHULA, Jens
14:40	[23] Heavy-quarkonium suppression from medium-induced gluon radiation	ARLEO, Francois
15:00	[17] The relation between cross-section, decay width and imaginary potential of heavy quarkonium in a quark-gluon plasma.	ESCOBEDO, Miguel Angel
15:20	[16] Improving the J/ψ Production Baseline at RHIC and the LHC	VOGT, Ramona
15:40	[86] J/ψ elliptic flow measurement in Pb-Pb collisions at forward rapidity in the ALICE experiment	MASSACRIER, Laure
