Monday, 28 May 2012

Parallel IIA: Heavy flavour - parallel room T3 (16:30 - 18:10)

time	[id] title	presenter
16:30	[80] D mesons suppression in Pb--Pb collisions at $\sqrt{s_{NN}}=2.76$ TeV measured by ALICE	CONESA DEL VALLE, Zaida
16:50	[123] Open charm hadron production via hadronic decays at STAR	TLUSTY, David
17:10	[135] Heavy flavor suppression: an interplay of electric and magnetic mass effects	DJORDJEVIC, Magdalena
17:30	[89] Open-charm meson elliptic flow measurement in Pb-Pb collisions at $\sqrt{s_{NN}} = 2.76$ TeV with ALICE at the LHC.	ORTONA, Giacomo
17:50	[132] Recent results on heavy quark quenching in ultrarelativistic heavy ions collisions: the effect of gluon damping	GOSSIAUX, Pol Bernard
