Mini-Workshop on Data Management activities

Data: to be defined but most probably in July

Indico page is growing here:

https://agenda.infn.it/event/42119/

Tentative Program

- Introduction and summary of what we mean by Data Management and what it means from an infrastructure and user point of view: The Use Case
- Architecture description: explaining what service description means, specifying what the user sees and saying what can be done today with the ARC resources
- High-level feature overview (user perspectives): This could be a seminar with a short hands-on as well

Next week we'll set the date and send an email with the details to WP5 addicted and also to other WPs
