New methods for reconstructing 3D e-beams structure

Thursday, 17 April 2025 09:00 (33 minutes)

Plasma-wakefield accelerators use tabletop equipment to produce relativistic femtosecond electron bunches. Optical and x-ray diagnostics have established that their charge concentrates within a micron-sized volume, but its sub-micron internal distribution, which critically influences gain in free-electron lasers or particle yield in colliders, has proven elusive to characterize. Here, by simultaneously imaging different wavelengths or collecting spectra of coherent optical transition radiation (COTR) that a laser-wakefield-accelerated e-bunch generated when exiting a metal foil, we reveal the structure of the coherently-radiating component of bunch charge. Key features of the images are shown to correlate uniquely with how plasma electrons injected into the wake by either a plasma-density discontinuity, by ionizing high-Z gas-target dopants, or by uncontrolled laser-plasma dynamics. With additional input from electron spectra, spatially-averaged COTR spectra, and particle-in-cell simulations, we reconstruct coherent 3D charge structures. The results demonstrate essential metrology for next-generation compact X-ray free-electron lasers driven by plasma-based accelerators.

Primary author: Dr LABERGE, Maxwell (Helmholtz-Zentrum Dresden-Rossendorf)

Co-authors: LUMPKIN, Alex (Fermi National Accelerator Laboratory); DEBUS, Alexander (Helmholtz-Zentrum Dresden-Rossendorf); HANNASCH, Andrea (University of Texas at Austin); WILLMANN, Anna (HZDR); IRMAN, Arie (Helmholtz Zentrum Dresden Rossendorf); BOWERS, Brant (University of Texas - Austin); TIEBEL, Jessica (HZDR); Dr COUPERUS CABADAĞ, Jurjen (Helmholtz-Zentrum Dresden - Rossendorf); DOWNER, Michael; ZARINI, Omid (Helmholtz-Zentrum Dresden - Rossendorf e.V.); UFER, Patrick (Helmholtz-Zentrum Dresden-Rossendorf); ZJADZAJ, Rafal (University of Texas - Austin); PAUSCH, Richard (Helmholtz-Zentrum Dresden - Rossendorf); SCHOEDEL, Susanne (Helmholtz-Zentrum Dresden-Rossendorf); SCHRAMM, Ulrich (HZDR); SCHRAMM, Ulrich (Helmholtz Zentrum Dresden Rossendorf); CHANG, Yen-Yu (Helmholtz Zentrum Dresden Rossendorf)

Presenter: Dr LABERGE, Maxwell (Helmholtz-Zentrum Dresden-Rossendorf)

Session Classification: Plenary Session
