

!CHAOS Mini Workshop

Monday, 12 December 2011 - Monday, 12 December 2011

INFN-LNF <!-- ID_UTENTE=483 -->

Scientific Programme

The mini-workshop program will introduce participants to the !CHAOS control system concept and the current status of development.

The software technologies, the architecture and the development strategies will be presented in detail.

More information will be provided on topical issues like the integration of LabVIEW as front-end development software, the implementation of fast data archiving by means of key/value databases and configurations and meta-data management.

A discussion on the future developments of the !CHAOS project and collaboration will close the works.
