The 2nd European AI for Fundamental Physics Conference (EuCAIFCon2025) Cagliari, Sardinia, 16-20 June 2025

Abstract

The abstract is in boldface, and should fit in 8 lines. It should be written in a clear and accessible style, emphasizing the context, the problem(s) studied, the methods used, the results obtained, the conclusions reached, and the outlook. You can add a table contents, recommended if your paper is more than 6 pages long.

Contents

1   Introduction

The stage is yours. Write your article here. The bulk of the paper should be clearly divided into sections with short descriptive titles, including an introduction and a conclusion.

2   A Section

Use sections to structure your article's presentation.

Equations should be centered; multi-line equations should be aligned.

$$H = \sum_{j=1}^{N} \Big[J(S_j^x S_{j+1}^x + S_j^y S_{j+1}^y + \Delta S_j^z S_{j+1}^z) - h S_j^z \Big]. \tag{1}$$

In the list of references, cited papers [**?**] should include authors, title, journal reference (journal name, volume number (in bold), start page) and most importantly a DOI link. For a preprint [**?**], please include authors, title (please ensure proper capitalization) and arXiv link. If you use BiBTeX with our style file, the right format will be automatically implemented.

All equations and references should be hyperlinked to ensure ease of navigation. This also holds for [sub]sections: readers should be able to easily jump to Section 3.

3   Another Section

There is no strict length limitation, but the authors are strongly encouraged to keep contents to the strict minimum necessary for peers to reproduce the research described in the paper.

3.1   A first subsection

You are free to use dividers as you see fit.

3.2   A note about figures

Figures should only occupy the stricly necessary space, in any case individually fitting on a single page. Each figure item should be appropriately labeled and accompanied by a descriptive caption. **SciPost does not accept creative or promotional figures or artist's impressions**; on the other hand, technical drawings and scientifically accurate representations are encouraged.

4   Conclusion

You must include a conclusion.

Acknowledgements

Acknowledgements should follow immediately after the conclusion.

Author contributions   This is optional. If desired, contributions should be succinctly described in a single short paragraph, using author initials.

Funding information   Authors are required to provide funding information, including relevant agencies and grant numbers with linked author's initials. Correctly-provided data will be linked to funders listed in the Fundref registry.

A   First appendix

Add material which is better left outside the main text in a series of Appendices labeled by capital letters.

B   About references

Your references should start with the comma-separated author list (initials + last name), the publication title in italics, the journal reference with volume in bold, start page number, publication year in parenthesis, completed by the DOI link (linking must be implemented before publication). If using BiBTeX, please use the style files provided on https://scipost.org/submissions/author_guidelines. If you are using our LaTeX template, simply add

`\bibliography{your_bibtex_file}`

at the end of your document. If you are not using our LaTeX template, please still use our bibstyle as

`\bibliographystyle{SciPost_bibstyle}`

in order to simplify the production of your paper.
