

RQI-N 2025 Posters preceded by Flash talks

Speaker	Title
Aleksandar Mikovic	Quantum gravity generalization of the Bohmian mechanics
Dario Cafasso	Gravitational time dilation from quantum interactions?
Dominic Lewis	Cross-scale correlations and interactions in wavelet-based quantum field theory
Grzegorz Czelusta	Spin networks on quantum computers
Gurpahul Singh	Trajectory-protected Quantum Computing
Sean Gregory	Tracking the nonlinear formation of an interfacial wave cascade: from one to few to many
Sebastian Murk	Kinematic and energy properties of dynamical regular black holes
Tadeusz Adach	Spinor fields in κ -Minkowski noncommutative spacetime
Uwe R. Fischer	Quantum many-body black holes
