

15th annual conference on Relativistic Quantum Information

(North)

Friday, 27 June 2025

Friday Parallel Session F - 1st floor, room 4 (14:10 - 16:10)

time	[id] title	presenter
14:10	[264] The localization problem: an antinomy between measurability and causal dynamics	GALE, Evan
14:25	[265] Quantum Larmor formula for uniformly accelerated charges	LIN, Shih-Yuin
14:40	[232] Relativistic implications of entropy and purity	BOJOWALD, Martin
14:55	[267] Quantum Langevin equation for finite-time interactions	UENAGA, Yuta
15:10	[268] Routing Quantum Control of Causal Order	GROTHUS, Maarten
15:25	[269] Role of Derivative Coupling in the Study of Acceleration Radiation in Curved Spacetimes	KRISHNAN, Anjana
15:40	[270] Using adaptiveness and causal superpositions against noise in quantum metrology	KURDZIALEK, Stanislaw
15:55	[282] Quantum many-body analogue black-holes and analogue cosmology	FISCHER, Uwe R.
