

Few communications

ALMA MATER STUDIORUM
UNIVERSITÀ DI BOLOGNA

- 7 November: Internal INFN Bologna meeting about the European Strategy for Particle Physics:
 - The meeting aims at providing our (INFN Bologna) view on the European Strategy Update.
 - Packed programme: <https://agenda.infn.it/event/43756/>. I will report on FCC - aiming at circulating the slides by Monday.
 - P. Giacomelli pointed me at an interesting talk from P. Spiccas (ECFA Chair).
- First IDEA study group meeting was a big success
 - We had ~ 60 participants, many from the US (not so many from CERN).
 - Second IDEA meeting will be on 19 November.
- Today we have an update about the integration of the DR calorimeter (end-cap) in k4geo.
- See many of you in Venezia next week.
- Is the frequency of these meetings ok? Too often?
