

ECOS 2012

giovedì 21 giugno 2012

Instrumentation (09:00 - 11:30)

time	[id] title	presenter
09:00	[37] Thin stable targets and actinide for high power applications-status and perspectives	EBERHARDT, Klaus
09:30	[38] Selected Gamma spectroscopy experiments with future high intensity stable ions beams: opportunities and challenges	LEONI, Silvia
10:00	[39] Recoil Separator experiments with highly intense stable beams:status and perspectives	DULLMANN, Christoph
10:30	[40] Charged particles detectors for high intensity beams: some thoughts and open problems	PASQUALI, Gabriele
11:00	[41] System design for nuclear structure experiments: online data reduction and distributed systems	SIMON, Haik
